

developed systems to retain the records and provide the disclosures required by the Rule. Rule compliance does not require the use of any capital goods, other than ordinary office equipment, to which providers would already have access.

The only additional cost imposed on IDSMS operating under the Rule that would not be incurred for other IDSMS is the annual audit requirement. One of the two IDSMS currently operating under the Rule estimates the total annual costs of this requirement to be less than \$100,000. Since there are two IDSMS operating under the Rule, the total non-labor cost imposed by them is an estimated \$200,000. This total includes copying costs of roughly \$20,000, which is based on estimated copying costs of 5 cents per page and several conservative assumptions or estimates. Staff estimates that the "average" dispute-related file is about 25 pages long and that a typical annual audit file is about 200 pages in length. For purposes of estimating copying costs, staff conservatively assumes that every consumer complainant requests a copy of the file relating to his or her dispute. Staff also assumes that, for 1,000 of the estimated 6,500 disputes each year, consumers request copies of warrantors' annual audit reports (although, based on requests for audit reports made directly to the FTC, the indications are that considerably less requests are actually made). Thus, the estimated total annual copying costs for average-sized files would be approximately \$8,125 (25 pages/file  $\times$  .05  $\times$  6,500 requests) and \$10,000 for copies of annual audits (200 pages/audit report  $\times$  .05  $\times$  1,000 requests), rounded to a total of \$20,000.

Combined with estimated annual labor cost of \$103,000, total estimated annual cost burden is \$303,000 (\$200,000 + \$103,000).

#### Proposed Projects

1. *The Second Longitudinal Study of Aging (LSOA II)-(0920-0411)—Revision—National Center for Health Statistics (NCHS).* The Second Longitudinal Study of Aging is a second-generation, longitudinal survey of a nationally representative sample of civilian, non-institutionalized persons 70 years of age and older. Participation is voluntary, and individually identified data are confidential. The LSOA II replicates portions of the first Longitudinal Study of Aging (LSOA), particularly the causes and consequences of changes in functional status. In addition, the LSOA II is designed to monitor the impact of changes in Medicare, Medicaid, and managed care on the health status of the elderly and their patterns of health care utilization. Both LSOAs are joint projects of the National Center for Health Statistics (NCHS) and the National Institute on Aging (NIA).

The Supplement on Aging (SOA), part of the 1984 National Health Interview Survey (NHIS), established a baseline on 7,527 persons who were then aged 70 and older. The first LSOA reinterviewed them in 1986, 1988 and 1990. Data from the SOA and LSOA have been widely used for research and policy analysis relevant to the older population.

In 1994, 9,447 persons aged 70 and over were interviewed as part of the National Health Interview Survey's Second Supplement on Aging (SOA II) between October of 1994 and March of 1996. The first LSOA II re-interview wave was conducted between May 1997 and March 1998. The LSOA II will re-interview the SOA II sample two
