

Center. However, that notice omitted reference to the authority in 40 U.S.C. 318, also related to the protection of property and persons. The purpose of this correction is to correct the paragraph of that February 19, 1997, notice by adding to it the authority in 40 U.S.C. 318, which should have been included in the notice.

FOR FURTHER INFORMATION CONTACT: William G. Ketterer, Senior Attorney, NIH (301) 496-6043.

Correction: Accordingly, in the **Federal Register** of February 19, 1997, in FR Doc. 97-4037, on page 7459, in the first column, correct the paragraph entitled "Authorities Delegated" to read:

Authorities Delegated: Authorities relating to the protection of Federal property vested in the Administrator of General Services by the Act of June 1, 1948, Public Law 80-566, 62 Stat. 281, 40 U.S.C. 486(d), 40 U.S.C. 318, 318a, and 318b, and the Federal Property and Administrative Services Act of 1949, as amended, 63 Stat. 377, are hereby delegated to the Director, National Institutes of Health (NIH), for the protection of the property and persons at NIH, National Cancer Institute's (NCI) facilities in the Frederick Cancer Research and Development Center ("NCI parcel") located in Frederick, MD.

DATES: Upon date of signature this correction is retroactive to January 28, 1997.

Dated: November 12, 1998.

Neil J. Stillman,

Deputy Assistant Secretary for Information Resources Management.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Validity of Self-Reported Drug Use in Population Surveys—New—During the period July 1999 through June 2000, SAMHSA and the National Institute on Drug Abuse (NIDA) will conduct a field Study to test

the validity of obtaining drug use data through a combination of computer assisted personal interviewing and audio computer-assisted self interviewing. A random sample of approximately 22,000 households (from households listed, but not used, in the National Household Survey on Drug Abuse (NHSDA) sample segments) will be selected for screening.

Approximately 3,333 persons from the civilian, non-institutionalized population of the United States ages 12-25 will be selected to be interviewed. First, a questionnaire (using a subset of the 1999 NHSDA questions, with a special set of questions for the validity study) will be administered to determine: (1) The reported prevalence of use of tobacco products, alcohol, illicit substances, and illicit use of prescription drugs, and (2) recent environmental exposures to tobacco and marijuana smoke. Then, permission will be sought to obtain hair and urine samples from respondents. Under a NIDA grant, these samples will be chemically analyzed to validate respondents' self-reports of drug use (about 2,000 respondents are expected to provide biological specimens). Respondents will be paid an incentive upon receipt of the hair/urine samples. The results will be used by SAMHSA, the Office of National Drug Control Policy, other Federal government agencies, and other organizations and researchers to estimate the extent of under-reporting on drug use surveys such as the NHSDA conducted by SAMHSA.

The estimated annualized burden for a one-year data collection period is summarized below.

	Number of respondents	Number of responses/respondent	Average burden/response (hours)	Total burden hours
Household screener	22,000	1	0.05	1,100
Questionnaire:				
No specimen	1,333	1	1.00	1,333
With specimens	2,000	1	1.50	3,000
Total				5,433

Send comments to Nancy Pearce, SAMHSA Reports Clearance Officer, Room 16-105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: November 16, 1998.

Richard Kopanda,

Executive Officer, SAMHSA.
