NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302]

Florida Power Corporation; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted a request by the Florida Power Corporation (FPC) to withdraw its October 31, 1997, application for an amendment to Facility Operating License No. DPR 72, issued to FPC for operation of the Crystal River Nuclear Generating Unit 3 (CR3) located in Citrus County, Florida. Notice of consideration of issuance of this amendment was published in the **Federal Register** on November 12, 1997 (62 FR 60735).

The proposed amendment would have revised the CR3 Technical Specifications (TS) relating to decay heat removal requirements in Mode 4. The proposed modification would have revised the TS and associated Bases to require in Mode 4, one operable emergency feedwater (EFW) train and

associated equipment, including the EFW tank, emergency feedwater initiation and control actuation instrumentation for EFW, post accident monitoring instrumentation, and the turbine bypass valves. Additionally, the TS and associated Bases would have been revised to require in Mode 4, a low-pressure injection (LPI) train, dedicated to the borated water storage tank, and to reflect that the available loops for decay heat removal do not include this dedicated LPI train. Editorial changes would also have been made to clarify the description of Mode 4 accidents requiring emergency core cooling system injection, and to revise the title of TS limiting condition for operation 3.7.5.

FPC's letter of November 18, 1998, informed the staff that the request was being withdrawn because the NRC staff had indicated that the subject of reactor decay heat removal requirements during Mode 4 operation would be treated as a generic industry issue. In this letter, FPC committed to continue to maintain administrative controls for the additional equipment and capability to remove decay heat identified in the October 31, 1997, request during Mode 4 operation of CR-3.

For further details with respect to this action, see the application for amendment dated October 31, 1997, and FPC's withdrawal letter dated November 18, 1998, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the local public document room located at the Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida.

NRC EXPORT LICENSE APPLICATION

Name of applicant, date of application, date received, application No.	Description of material		End use	Country
	Material type	Total qty		
Transnuclear, Inc., October 30, 1998, November 2, 1998, XSNM03060.	High-enriched Uranium (93.3%).	130.65 kg	Production of medical isotopes.	Canada.

For the Nuclear Regulatory Commission. Dated this 24th day of November 1998 at Rockville, Maryland.

Ronald D. Hauber,

Director, Division of Nonproliferation, Exports and Multilateral Relations, Office of International Programs.

NUCLEAR REGULATORY COMMISSION

Application for a License To Export Special Nuclear Material

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following application for an export license. Copies of the application are on file in the Nuclear Regulatory Commission's Public Document Room located at 2120 L Street, N.W., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; and the Executive Secretary, U.S. Department of State, Washington, D.C. 20520.

The information concerning the application follows.

application for proposed amendments to Facility Operating License Nos. NPF-4 and NPF-7 for the North Anna Power Station, Unit Nos. 1 and 2, located in Louisa County, Virginia.

The proposed amendments would have clarified the requirements for testing charcoal adsorbent in the Waste Gas Charcoal Filter System, the Control Room Emergency Habitability System, and the Safeguards Area Ventilation System.

The Commission had previously issued a Notice of Consideration of
