

process that would include microfiltration, reverse osmosis and disinfection. The microfiltration process uses a series of microscopically fine filters to remove fine particles, nitrogen, salts, and organic matter that might be in the water. The water from this advanced treatment process would be of better quality than the current water that is in-filtered into the groundwater basin from the Santa Ana River and would surpass (be cleaner and better than) the drinking water standards set by the U.S. Environmental Protection Agency, the California Department of Health Services and other health and regulatory agencies.

The water from this process would be piped to injection wells to create a barrier against saltwater intrusion and to a spreading basin for infiltration into the groundwater basin. The Project would provide a new, reliable water supply to meet increased demands for potable water within the OCWD service area and continue to protect the existing groundwater from further contamination from seawater intrusion. The Project water would also be used to supplement the existing Green Acres Project, which uses recycled water for landscape irrigation and industrial applications. The Project would help reduce the dependency on the uncertain water supplies currently received from northern California and the Colorado River.

Extensive evaluations have been conducted over the past seven years to define and determine the water supply alternatives to meet the future needs of Orange County Water District's customers. The Project was identified to be one of the most reliable and cost effective project alternatives for providing a new local water supply to Orange County. The Project would be implemented in three phases. Phase I would be implemented by the year 2003 and would supply 50,000 acre-feet per year (afy) (one afy is sufficient water to supply two families of four for an entire year). Phases II and III would supply an additional 25,000 afy by the years 2010 and 2020 respectively, or sooner if required.

SUPPLEMENTARY INFORMATION:

Overview

The Violent Crime Control and law Enforcement Act of 1994 (Pub. L. 103-322) authorizes the Department of Justice to make grants to increase deployment of law enforcement officers devoted to community policing on the streets and rural routes in this nation. The Universal Hiring Program (UHP) enables interested agencies to supplement their current sworn forces, or interested jurisdictions to establish a new agency, through Federal grants for up to three years. All policing agencies, as well as jurisdictions seeking to establish new policing agencies, are eligible to apply for this program.

Grants will be made for up to 75 percent of the total salary and benefits for each new officer over three years, and up to a maximum of \$75,000 per officer, with the remainder to be paid by state or local funds.
