

A no take alternative was not feasible due to the widespread distribution of potential habitat for the listed species in the 14-acre mining area.

Under the no action alternative, the Service would not issue an incidental take permit to the Kaiser Company, the Habitat Conservation Plan would not be implemented, and mining expansion would not occur at the Felton Sand Plant. The Plant could still operate for the next 10 years, but only within the confines of the existing mining operation areas. Reclamation of previously mined areas would occur pursuant to the California Surface Mining and Reclamation Act; however, this alternative would not include the permanent habitat protection and conservation within the facility provided through the Habitat Conservation Plan.

This notice is provided pursuant to section 10(a) of the Act and Service regulations for implementing the National Environmental Policy Act of 1969 (40 CFR 1506.6). The Service will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of law. If the Service determines that the requirements are met, a permit will be issued for the incidental take of the listed species. A final decision on permit issuance will be made no sooner than 30 days from the date of this notice.
