BILLING CODE 7590-01-P

exclusive responsibility for, and control over, the physical construction, operation, and maintenance of PNPP as reflected in Operating License No. NPF-58. The U.S. Nuclear Regulatory Commission (NRC) issued License No. NPF-58 on March 18, 1986, pursuant to Part 50 of Title 10 of the Code of Federal Regulations (10 CFR Part 50). The facility is located on the shore of Lake Erie in Lake County, Ohio, approximately 35 miles northeast of Cleveland, Ohio.

II.

By application dated June 30, 1998, as supplemented by submittals dated October 27 and November 30, 1998, the licensees requested approval of the transfer of operating authority under the license to a new company, FirstEnergy Nuclear Operating Company (FENOC), and issuance of a conforming amendment. The licensees proposed to transfer operating authority under the license to FENOC to allow it to use and operate PNPP and to possess and use related licensed nuclear materials in accordance with the same conditions and authorizations in the current operating license. The licensees have also requested the issuance of a license amendment reflecting the transfer of operating authority. FENOC, a wholly-owned subsidiary of FirstEnergy Corporation, the direct or indirect parent of the owners of PNPP except for Duquesne Light Company, would become the licensed operator for PNPP and would have exclusive control over the operation and maintenance of the facility. The present plant organization, the oversight organizations, and the engineering and support organizations would be transferred essentially intact from the current operating licensees to FENOC. The technical qualifications of the FENOC organization, therefore, would be at least equivalent to those of the existing organization responsible for operating the plant. CSC, which has no ownership interest in PNPP, and is licensed only as an operator of PNPP, would be removed from the license.

Under the proposed arrangement, ownership of PNPP would remain unchanged; each owner would retain its current ownership interest. FENOC would not own any portion of PNPP. Likewise, the owners' entitlement to capacity and energy from PNPP would not be affected by the proposed transfer of operating responsibility for PNPP to FENOC. The owners would continue to provide all funds for FENOC to operate, maintain, and decommission PNPP. The owners' responsibilities would include providing funding for any emergency situations that might arise at PNPP.
