

recently approached NASS to request that an agriculture census and a survey of residences covering 1998 be conducted in American Samoa, and that subsequently, American Samoa be included in the 5-year agriculture census cycle. NASS will collect information using a survey of the American Samoa residences.

*Need and use of the information:* NASS will collect information on the number and type of farms, land use, crop acreage and production, livestock inventory and sales production expenses, farm-related income, and other characteristics. The data will be used by the Administration, Federal agencies, and Congress to formulate and evaluate national farm and rural policies and programs, and by the USDA and Bureau of Economic Analysis to compile the farm sector economic indicators and the national income accounts. Without the census of agriculture, there would be no reliable source of data consistent throughout the 50 states and over 3,000 counties in the United States.

*Description of respondents:* Farms, Individuals or households.

*Number of respondents:* 3,589,580.

*Frequency of responses:* Reporting: Other (One time only).

*Total burden hours:* 1,320,705.

Emergency approval for this information collection has been requested by December 11, 1998.
