

preliminary Draft Program Statement was prepared for internal review which addressed alternatives for site design at the falls. Design elements such as falls view area, main entry area, picnic area, main trail, main bridge, eastern channel trail, parking, revegetation, and signs were considered. Yosemite Falls site plans that are still under consideration will be included in the consolidated SEIS/YVP.

Scoping/Decision Process

The existing four park stewardship initiatives summarized above yielded very extensive and detailed baselines which will be corroborated, clarified, or refined as necessary in the consolidation effort. Moreover, incisive public comment and agency consultations provided a valuable foundation for preparing those documents. As noted above, all comments received during past scoping activities or formal response periods are safeguarded in detailed administrative records, and will be duly re-considered in developing the consolidated SEIS/YVP. Consequently at this time it is necessary to submit only new issues or concerns not voiced previously. Also, all past respondents are being incorporated into a single mailing list—information about this comprehensive conservation planning and impact analysis process will be timely distributed via newsletters, mailings, and regional and local news media. To request being added now to the inclusive mailing list, or to obtain details about information options, please contact park staff via telephone at (209) 372-0261. Interested individuals, organizations, and agencies wishing to provide written comments on new issues or concerns should respond to: Superintendent, Attn: SEIS/YVP, P.O. Box 577, Yosemite National Park, CA 95389. Any new comments must be postmarked not later than January 15, 1999.

Availability of the Draft SEIS/YVP for review and written comment will be announced by formal Notice, via local and regional news media, and direct mailing. At this time the Draft SEIS/YVP is anticipated to be available for public review during late spring 1999. Comments on the Draft SEIS/YVP will be fully considered, and incorporated in a Final SEIS/YVP as appropriate. At this time it is anticipated that the Final SEIS/YVP would be completed during fall 1999. Notice of an approved Record of Decision would be published in the **Federal Register** not sooner than thirty (30) days after the Final SEIS/YVP is distributed. This is expected to occur by the end of 1999. The official responsible

for the decision is the Regional Director, Pacific West Region, National Park Service; the official responsible for implementation is the Superintendent, Yosemite National Park.

Dated: December 9, 1998.

Patricia L. Neubacher,

Acting Regional Director, Pacific West.
