SUPPLEMENTARY INFORMATION:

In a December 1, 1998 Staff Requirements Memorandum, the Commission disapproved publication of the staff's draft proposed rule. The Commission directed the staff to continue to discuss all relevant documents with stakeholders (NEI, Department of Energy, and others) in public, including use of the Internet, and submit a revised proposed rulemaking package to the Commission for approval six months from December 1, 1998. In the process of developing a revised draft proposed rule package, the NRC staff will periodically make interim drafts publicly available, as noted above, and seek comments on those drafts. When the Commission has approved a proposed rule, it will be published in the **Federal Register** for formal public comment.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class D airspace at Lawrenceville, GA. An automated weather observing system has been installed in the Gwinnett County-Briscoe Field Airport Traffic Control Tower, which transmits the required weather observations. Therefore, the airport now meets the criteria for Class D airspace. Class D airspace designations for airports are published in Paragraph 5000 of FAA Order 7400.9F, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant

regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9F, Airspace Designations and Reporting Points, dated September 10, 1998, and effective September 16, 1998, is amended as follows:

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Class E airspace area at Selinsgrove, PA. A GPS RWY 17 SIAP has been developed and the VOR or GPS–A SIAP has been amended for the Penn Valley Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate these SIAPs and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9F, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.
