SUPPLEMENTARY INFORMATION:

Background

One of the missions of the Corporation is to "provide opportunities to engage in service that addresses the nation's unmet human, educational, environmental, and public safety needs" (42 U.S.C. 12501(b)). Through the AmeriCorps*State/National program, the Corporation supports the efforts of local, state and national organizations that engage American adults in results-driven community service. Community service efforts include, but are not limited to: providing tutoring and immunization services for pre-school through twelfth grade children, and recruiting and training volunteers in local communities to provide health and independent living assistance to community residents, housing assistance to the homeless, community policing activities, and services to reduce environmental risk.

The Corporation has placed a priority on evaluating the outcomes of these efforts. A primary goal of the Corporation is that communities will be made stronger through the services its programs provide. In addition to outcomes, key considerations in determining a number of policy and programming issues in Corporation programs are program impact and net societal benefit. This data collection will address not only the value that communities place on the outcomes achieved by national service programs, but also whether the outcomes would have occurred in the absence of the programs.

Current Action

The Corporation seeks approval of a survey form for the evaluation of the Corporation's AmeriCorps*State/National programs that it supports through grants. The survey will allow for the enhancement of the Corporation's future efforts in devising methods to measure progress toward its goals. It also may contribute important information to the knowledge base of the community service field by identifying essential program components that lead to valued outcomes and program effectiveness.
