information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Proposed Projects

1. Multi-Center Cohort Study to Assess the Risk and Consequences of Hepatitis C Virus Transmission from Mother to Infant (0920-0344)—Extension—The National Center for Infectious Diseases—The purpose of the study is to determine the incidence of vertical hepatitis C virus (HCV) transmission, to assess risk factors for vertical HCV transmission, to assess the clinical course of disease among infants with HCV infection, and to assess diagnostic methods for detecting HCV infection in infants. Respondents for the study will be anti-HCV positive mothers. We are requesting an extension to complete data collection for this study. The respondents will be remunerated for travel costs; provided well-child visits and free vaccinations for infants enrolled in the study; and, provided anti-HCV testing to all family members free of charge. The total annual burden hours are 53.

Respondents	Form name	Number of respondents	Number of responses/respondent	Avg. burden/response (in hrs.)
Mothers	Form G	300	8	0.10

Note: The annualized response burden is estimated to be 240 hours/4.5 years= 53 hours.

2. Requirement for a Special Permit to Import *Cynomolgus*—African Green or Rhesus Monkeys—(0920-0263)—Extension—National Center for Infectious Disease (NCID) Division of Quarantine—A registered importer nonhuman primates must submit to the Director, CDC, a written plan which specifies the steps that will be taken to prevent exposure of persons and

animals during the entire importation and quarantine process for the arriving nonhuman primates. Under the special permit arrangement, registered importers must submit a plan to CDC for the importation and quarantine if they wish to import the specific monkeys covered. The plan must address disease prevention procedures to be carried out in every step of the chain of custody of

such monkeys, from embarkation in the country of origin to release from quarantine. Information such as species, origin and intended use for monkeys, transit information, isolation and quarantine procedures, and procedures for testing of quarantined animals is necessary for CDC to make public health decisions. This information enables CDC to evaluate compliance with the

standards and determine whether the measures being taken to prevent exposure of persons and animals during importation are adequate. Once CDC is assured, through the monitoring of shipments (normally no more than 2), that the provisions of a special permit plan are being followed by a new permit holder, and that the use of adequate

disease control practices is being demonstrated, the special permit is extended to cover the receipt of additional shipments under the same plan for a period of 180 days, and may be renewed upon request. This eliminates the burden on importers to repeatedly report identical information, requiring only that specific shipment

itineraries and information on changes to the plan which require approval be submitted.

The respondents are commercial or not-for-profit importers of nonhuman primates. We are requesting clearance for 3 years. Total annual burden hours are 14.

Respondents	Number of respondents	Number of responses/ respondents	Avg. burden/ responses (in hrs.)
Businesses or organizations	2	5	0.5
	3	5	0.1
	15	5	0.1
