Approval and Promulgation of State Implementation Plan; Illinois**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

SUMMARY: EPA is proposing to approve the September 16, 1998, Illinois State Implementation Plan (SIP) revision request containing amendments to Volatile Organic Material (VOM) rules affecting Illinois' ozone attainment area (the area of the State not including the Chicago and Metro-East ozone nonattainment areas), as a requested revision to the ozone State Implementation Plan (SIP). In the final rules section of this **Federal Register**, the EPA is approving the State's requests as a direct final rule without prior proposal because EPA views this action as noncontroversial and anticipates no adverse comments. A detailed rationale for approving the State's request is set forth in the direct final rule. The direct final rule will become effective without further notice unless the Agency receives relevant adverse written comment on this action. Should the Agency receive such comment, it will publish a final rule informing the public that the direct final rule will not take effect and such public comment received will be addressed in a subsequent final rule based on this proposed rule. If no adverse written comments are received, the direct final rule will take effect on the date stated in that document and no further activity will be taken on this proposed rule. EPA does not plan to institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

National Emission Standards for Hazardous Air Pollutants: Natural Gas Transmission and Storage**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Supplemental notice of proposal; reopening of public comment period and notice of public hearing.

SUMMARY: On February 6, 1998 (63 FR 6288), the EPA proposed standards (the proposal or proposed standards) to limit emissions of hazardous air pollutants (HAP) from existing and new natural gas transmission and storage facilities under section 112 of the Clean Air Act as amended in 1990 (Act). The public comment period on the proposed standards ended April 7, 1998. This action announces the availability of supplemental information, the reopening of the public comment period on the supplemental information, and the notice of public hearing.

During the public comment period, the EPA received comments that the data collected by the EPA to support development of the proposed rule did not adequately characterize the HAP emission sources and controls in the natural gas transmission and storage source category. The EPA agreed to solicit and consider additional data pertaining to the development of maximum available control technology (MACT) standards for the natural gas transmission and storage source category. The EPA plans to consider comments received on this action, along with comments received on the proposal, and take final action by May 15, 1999.
