

Program, at (916) 657-2666. If reasonable accommodation is needed due to a disability, please contact the Equal Employment Opportunity Office at (916) 653-6952 or TDD (916) 653-6934 at least one week prior to the meeting.

SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the State of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of CALFED. The Program is exploring and developing a long-term solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem, provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long-term solutions for the problems affecting the Bay-Delta system. This group, known as the Bay-Delta Advisory Council has been chartered under the Federal Advisory Committee Act (FACA). The BDAC provides advice to CALFED on the program mission, problems to be addressed, and objectives for the CALFED Program. BDAC provides a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff. BDAC has established a subcommittee called the Ecosystem Roundtable to provide input on annual workplans to implement ecosystem restoration projects and programs.

Minutes of the meeting will be maintained by the Program, Suite 1155, 1416 Ninth Street, Sacramento, California 95814, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.

Roger Patterson,

Regional Director, Mid-Pacific Region.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-3453]

Atlas Corporation

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of receipt of a request from Atlas Corporation to revise a site-reclamation milestone in License No. SUA-917 for the Moab, Utah facility and notice of opportunity for a hearing.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has received, by letter dated December 22, 1998, a request from Atlas Corporation (Atlas) to amend License Condition (LC) 55 B.(2) of Source Material License SUA-917 for the Moab, Utah, facility. The license amendment request proposes to modify LC 55 B.(2) to change the completion date for ground-water corrective actions to meet performance objectives specified in the ground-water

corrective action plan. Atlas proposes to revise the date pursuant to the reasonable and prudent alternative and mitigative measures stipulated in the Biological Opinion issued by the U.S. Fish and Wildlife Service on July 31, 1998. The reasonable and prudent alternative states that ground water should be cleaned up to relevant standards within 7 years from Atlas' receipt of NRC approval of a revised ground-water corrective action plan.

FOR FURTHER INFORMATION CONTACT:

Myron Fliegel, Office of Nuclear Material Safety and Safeguards, Washington, DC 20555. Telephone (301) 415-6629.

SUPPLEMENTARY INFORMATION: The portion of LC 55 B.(2) with the proposed change would read as follows:

B. Reclamation, to ensure required longevity of the covered tailings and ground-water protection, shall be completed as expeditiously as is reasonably achievable, in accordance with the following target dates for completion.

(2) Projected completion of ground-water corrective actions to meet performance objectives specified in the ground-water corrective action plan—July 31, 2006.

Atlas' request to amend LC 55 B.(2) of Source Material License SUA-917, which describes the proposed changes to the license condition and the reason for the request, is being made available for public inspection at NRC's Public Document Room at 2120 L Street, NW (Lower Level), Washington, DC 20555.

NRC hereby provides notice of an opportunity for a hearing on the license amendment under the provisions of 10 CFR Part 2, Subpart L, "Informal Hearing Procedures for Adjudications in Materials and Operator Licensing Proceedings." Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing. In accordance with § 2.1205(c), a request for a hearing must be filed within 30 days of the publication of this notice in the **Federal Register**. The request for a hearing must be filed with the Office of the Secretary, either:

(1) By delivery to the Docketing and Service Branch of the Office of the Secretary at One White Flint North, 11555 Rockville Pike, Rockville, MD 20852; or

(2) By mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

In accordance with 10 CFR 2.1205(e), each request for a hearing must also be
