

4. 10 waters that were identified as impaired (not meeting water quality standards or designated uses) in the Commonwealth's 1998 Section 305(b) report but were not included by Virginia on the Section 303(d) list.

5. 6 waters that already are listed for one or more pollutants but, based on information from the Commonwealth's 1998 Section 306(b) report, should be listed for an additional pollutant.

In addition to identifying the five groups of waters above, EPA recommends that the Commonwealth modify the priority rankings, from medium to high, for four waters identified by the U.S. Fish and Wildlife Service as adversely impacting endangered species.

#### SUPPLEMENTARY INFORMATION:

#### I. EPA's Persistent Bioaccumulative Toxic (PBT) Pollutants Strategy

In the **Federal Register** of November 17, 1998 (63 FR 63926) (FRL-6045-2), EPA published a Notice announcing the availability of a draft strategy for affecting reductions in the releases and exposures to persistent, bioaccumulative toxic (PBT) pollutants, including a specific draft action plan for mercury. That notice requested the submission of written comments by February 16, 1999.

## II. EPCRA Section 313/PPA Section 6607 Proposed Rulemaking

In 1986, Congress enacted the Emergency Planning and Community Right-to-Know Act (EPCRA). In 1990, Congress passed the Pollution Prevention Act. Section 313 of EPCRA and section 6607 of PPA require certain businesses to submit reports each year on the amounts of toxic chemicals their facilities release and otherwise manage as waste. The purpose of these requirements is to inform the public, government officials, and industry about releases and other quantities managed as waste in their communities.

Currently, the EPCRA section 313 reporting thresholds are 25,000 pounds for the "manufacture" or "processing" of a toxic chemical and 10,000 pounds for the "otherwise use" of a toxic chemical. On January 5, 1999 (64 FR 688) (FRL-6032-3), EPA proposed: (1) To lower the reporting thresholds for certain PBT chemicals that are subject to EPCRA section 313 and PPA section 6607; (2) to lower the reporting thresholds for dioxin and dioxin-like compounds, which were previously proposed for addition to the EPCRA section 313 list of toxic chemicals; and (3) to add certain PBT chemicals to the EPCRA section 313 list of toxic chemicals. The Agency also presented persistence and bioaccumulation criteria in the proposed rule. These public meetings are being scheduled in order to provide a forum for dialog to be shared by EPA, potentially affected industry groups, and the public about the basis of EPA's proposed action, options provided, and potential impacts and benefits.

## III. Notice of Public Meeting

This Notice announces the Agency's intention to hold six public meetings to receive comments on both the PBT Strategy (including the Mercury Action Plan) and the EPCRA section 313 proposed rule. EPA planned these public meetings to cover these related actions because it believes that the same individuals are likely to want to comment on both. Therefore the public meetings have been scheduled such that comment on the PBT Strategy may be provided in the morning and comment on the EPCRA section 313 proposed rule may be provided in the afternoon. Oral statements will be scheduled on a first-come first-serve basis by calling the Emergency Planning and Community Right-to-Know Hotline at the numbers listed under FOR FURTHER INFORMATION CONTACT. All statements will be part of the public record.
