

II. EPCRA Section 313/PPA Section 6607 Proposed Rulemaking

In 1986, Congress enacted the Emergency Planning and Community Right-to-Know Act (EPCRA). In 1990, Congress passed the Pollution Prevention Act. Section 313 of EPCRA and section 6607 of PPA require certain businesses to submit reports each year on the amounts of toxic chemicals their facilities release and otherwise manage as waste. The purpose of these requirements is to inform the public, government officials, and industry about releases and other quantities managed as waste in their communities.

Currently, the EPCRA section 313 reporting thresholds are 25,000 pounds for the "manufacture" or "processing" of a toxic chemical and 10,000 pounds for the "otherwise use" of a toxic chemical. On January 5, 1999 (64 FR 688) (FRL-6032-3), EPA proposed: (1) To lower the reporting thresholds for certain PBT chemicals that are subject to EPCRA section 313 and PPA section 6607; (2) to lower the reporting thresholds for dioxin and dioxin-like compounds, which were previously proposed for addition to the EPCRA section 313 list of toxic chemicals; and (3) to add certain PBT chemicals to the EPCRA section 313 list of toxic chemicals. The Agency also presented persistence and bioaccumulation criteria in the proposed rule. These public meetings are being scheduled in order to provide a forum for dialog to be shared by EPA, potentially affected industry groups, and the public about the basis of EPA's proposed action, options provided, and potential impacts and benefits.

III. Notice of Public Meeting

This Notice announces the Agency's intention to hold six public meetings to receive comments on both the PBT Strategy (including the Mercury Action Plan) and the EPCRA section 313 proposed rule. EPA planned these public meetings to cover these related actions because it believes that the same individuals are likely to want to comment on both. Therefore the public meetings have been scheduled such that comment on the PBT Strategy may be provided in the morning and comment on the EPCRA section 313 proposed rule may be provided in the afternoon. Oral statements will be scheduled on a first-come first-serve basis by calling the Emergency Planning and Community Right-to-Know Hotline at the numbers listed under FOR FURTHER INFORMATION CONTACT. All statements will be part of the public record.

Notice of Environmental Assessment on the Proposed Reissuance of General Permits for Concentrated Animal Feeding Operations in New Mexico, Oklahoma, and Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for comment on environmental assessment and finding of no significant impact.

SUMMARY: The Regional Administrator of EPA Region 6 has preliminarily determined that reissuance of National Pollutant Discharge Elimination System (NPDES) general permits authorizing discharges from concentrated animal feeding operations (CAFOs) in Texas (TXG800000, TXG810000), Oklahoma

(OKG800000, OKG810000), and New Mexico (NMG800000, NMG810000) will not significantly affect the quality of the human environment and that preparation of an environmental impact statement for further evaluation of that action is thus unnecessary. The environmental assessment (EA) supporting that preliminary determination describes the EPA's currently preferred alternatives, which differ in some instances from alternatives previously described in the notice proposing these permit actions. Interested Federal, State and local agencies, environmental groups, and individuals are invited to submit written comments on the preliminary determination and on the EA.

DATES: Written comments on EPA's finding of no significant impact (FONSI) or the EA may be submitted to the address below on or before February 25, 1999.

ADDRESSES: Copies of the FONSI and supporting environmental assessment (EA) may be obtained from Robert D. Lawrence, Acting Associate Director, Compliance Assurance and Enforcement Division (6EN-XP), EPA Region 6, 1445 Ross Avenue, Dallas, Texas 75202-2733;

Telephone (214) 665-2258. Written comments should be submitted to Mr. Lawrence at the same address.

The FONSI and EA are also available on the internet at the following website address: <http://www.epa.gov/region6/water/npdes/genpermt>

FOR FURTHER INFORMATION CONTACT: For further information on this matter, please write or call Mr. Lawrence at the above address and telephone number.

SUPPLEMENTARY INFORMATION: EPA Region 6 proposed to reissue NPDES permits authorizing discharges from CAFOs in Texas, Oklahoma, and New Mexico at 63 FR 34874 (June 26, 1998). On September 11, 1998, the Agency reopened the comment period to solicit additional comments on a number of specific issues. See 63 FR 48731. EPA is still considering numerous comments it received on the proposed permits.

The Agency has prepared an EA to assist it in determining whether the proposed permit action may significantly affect the quality of the human environment and thus require preparation of an environmental impact statement pursuant to section 102(2) (C) of the National Environmental Policy Act of 1969. In some areas, the EA describes EPA's currently preferred

alternatives, which differ somewhat from alternatives described in its June 26, 1998, proposal. The public is also welcome to comment on this revised thinking/analysis. EPA will make no final decision on the FONSI or proposed permits until it considers all timely comments it receives.

Samuel J. Coleman,

Director, Compliance Assurance and Enforcement Division (6EN), Region 6.
