## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

**Notice of Availability of a Recommended Survey Protocol for the Endangered Quino Checkerspot Butterfly** (*Euphydryas editha quino*) for the 1999 Field Season

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of Availability; Survey Protocol.

**SUMMARY:** The Fish and Wildlife Service (Service) announces the availability of its recommended survey protocol for the 1999 field season for determining the presence/absence of the endangered Quino checkerspot butterfly. Using information gathered during the 1998 field survey season, we revised the "Interim General Survey Protocols and Mitigation Guidelines for the Endangered Quino Checkerspot Butterfly (*Euphydryas editha quino*)" dated November 4, 1997. The current recommended protocol entitled "Survey Protocol for the Endangered Quino Checkerspot Butterfly (*Euphydryas editha quino*) for the 1999 Field Season" dated January 25, 1999, incorporates those modifications found to be appropriate and replaces the 1997 interim protocol. We intend to annually review and modify this survey protocol to ensure that the best scientific information is incorporated into the prescribed methodology.

**DATES:** Data, and comments on the 1999 field season protocol received by August 2, 1999, will be considered in the

development of the year 2000 field season protocol.

**ADDRESSES:** Copies of this protocol may be obtained from the Service's Region 1 World Wide Web Home Page at <http://www.r1.fws.gov/text/species.html> or from the Field Supervisor, Carlsbad Fish and Wildlife Office, 2730 Loker Ave. West, Carlsbad California 92008.

Comments and materials concerning the survey protocol should be sent to the Field Supervisor at the above address.

**FOR FURTHER INFORMATION CONTACT:** Douglas Krofta or Paul Barrett at the above address (telephone 760/431-9440, facsimile 760/431-9618).

#### SUPPLEMENTARY INFORMATION:

#### Background

The Quino checkerspot butterfly was listed as an endangered species on January 16, 1997 (62 FR 2313) as result of loss and degradation of habitat, invasion by alien species, overgrazing, poorly planned fire management practices, and off-road vehicle use. The historic range of the Quino checkerspot butterfly extended from the Santa Monica Mountains east and south along the foothills of the Transverse and Peninsular Ranges in California, and south into northwest Baja California, Mexico. Adults have been found from sea level to approximately 1,500 meters (5,000 feet) and populations can be found today in southern San Diego County and southwestern Riverside County, California in association with grasslands, and open areas in coastal sage scrub, chaparral, and sparse native woodlands. Adult butterflies can be observed from mid-February to mid-May depending on weather and are most easily detected on open or sparsely vegetated rounded hilltops, ridgelines, and occasionally rocky outcrops.

We are seeking additional information to more adequately understand the occurrence and biology of the Quino checkerspot butterfly throughout its range. Because we intend to annually review and modify the recommended survey protocol to ensure that the best scientific information is incorporated into the prescribed methodology, data and comments on the 1999 field season protocol received by August 2, 1999, will be considered in the development of the year 2000 field season protocol.

Dated: January 22, 1999.
