

recommendations to the Agency for re-evaluating existing standards.

In many instances, EPA found that there was no new information sufficient to support a decision to revise an existing standard. For example, in the case of dioxin, the Agency is revising its risk assessment, but that information is not yet available. When it is available, the Agency may re-evaluate existing standards if that is indicated by new data. Similarly, EPA is engaged in a large, multi year research and data collection effort to better define health risks, occurrence and exposure, and treatment effectiveness for microbial contaminants and disinfection byproducts in drinking water. Research areas include reproductive and developmental effects, and sensitive sub population exposures. The final Stage I Rule for Disinfectants and Disinfectant By Products was issued on December 16, 1998. A health assessment for fetuses, infants and children was conducted to support the rule.

In some cases, EPA is already engaged in re-evaluating standards identified in the public comments. Examples include the reevaluation of the organophosphate and triazine pesticides. The Agency is required by the Food Quality Protection Act (FQPA) to re-evaluate all pesticide tolerances, basing new decisions on aggregate exposures and common mechanisms of action. The FQPA requires use of an additional uncertainty factor to protect children unless reliable data demonstrate the additional factor is unnecessary. Further, the Agency issued on November 16, 1998, a Draft Multimedia Strategy for Priority Persistent, Bioaccumulative, and Toxic (PBT) Pollutants which includes an Action Plan for Mercury. The goal of the strategy is to further reduce risks to human health and the environment from existing and future exposure to priority PBTs such as mercury, dioxins, furans, chlordane, DDT, dieldrin, toxaphene, hexachlorobenzene, alkyl-lead and PCBs. Further a draft rule for identifying lead hazards in dust, soil and paint was issued on June 3, 1998.

In summary, EPA's decisions to reevaluate the Chloralkali NESHAP (mercury); the implementation and enforcement of the (Farm) Worker Protection Standards; pesticide tolerances for the organophosphates (chlorpyrifos, dimethoate, methyl parathion); atrazine (pesticide tolerance and MCL); and to review indoor and ambient air quality as they relate to asthma are based in part and are supported by recommendations received through the **Federal Register** document and from the Children's Health Protection Advisory Committee.

Attachment B—CHPAC Screening Criteria to Select Rules for Re-Evaluation (2/24/98)

Children's health protection would be strengthened if these regulation-based standards, policies or rules were re-evaluated and subsequently changed because:

A. Children's health was not considered in the original development of the standard, such as:

- Exposure estimates did not adequately account for children's behavior;
- Toxicology studies did not include fetal, neonatal, and early childhood exposure; or
- The standard did not consider the full range of appropriate toxicological endpoints for fetal, neonatal, and early childhood exposure.

B. Children's health was considered but new information or data suggest the standard does not adequately protect children. The new information or data, based on peer-reviewed science, may include considerations such as:

- Descriptions of adverse health effects in children;
- Increased susceptibility for children to specific substances because of their unique physiology;
- New understanding of routes of exposure to children;
- Mechanisms of exposure that better reflect children's activities;
- Whether, and the extent to which the regulated substance is persistent and bioaccumulative;
- Improved methodologies for evaluating human health risks;
- Epidemiology studies;
- consideration of disproportionate exposures to sub-populations (e.g., geographic, racial);
- Toxicity studies;
- Environmental monitoring studies;

or

C. Major threats to children's health will be addressed such that a change in the regulation will result in a significant improved health outcome for children:

- Severity of health outcome of concern;
- Number of children adversely affected;
- Substances to which children are highly exposed; or
- Substances to which children are highly susceptible.

D. Revisions will have broad precedent setting impacts in terms of changing the procedures, guidelines, and overall culture of the Agency to include children's environmental health issues in all aspects of its work.

E. Children's health issues could be assigned higher priority for rules

selected (e.g., how revisions to the rules fit Agency existing plans/schedules).

F. Rules will span a diverse list of hazards (e.g., variety of substances and/or media programs) and a variety of health endpoints (e.g., cancer, non-cancer).

G. Rules whose effectiveness in protecting children's health would be greatly enhanced by revisions that facilitate its implementation or improve its enforceability.

Dated: January 26, 1999.

E. Ramona Trovato,

Director, Office of Children's Health Protection.

BILLING CODE 6560-50-U

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-51922; FRL-6060-2]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5 of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical to notify EPA and comply with the statutory provisions pertaining to the manufacture or import of substances not on the TSCA Inventory. Section 5 of TSCA also requires EPA to publish receipt and status information in the **Federal Register** each month reporting premanufacture notices (PMN) and test marketing exemption (TME) application requests received, both pending and expired. The information in this document contains notices received from December 17, to December 31, 1998.

ADDRESSES: Written comments, identified by the document control number "[OPPTS-51922]" and the specific PMN number, if appropriate, should be sent to: Document Control Office (7407), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Rm. ETG-099 Washington, DC 20460.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: oppt.ncic@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1/6.1 file format or ASCII file format. All

comments and data in electronic form must be identified by the docket number [OPPTS-51922]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found under "SUPPLEMENTARY INFORMATION" of this document.

FOR FURTHER INFORMATION CONTACT:

Susan B. Hazen, Director,
Environmental Assistance Division
(7408), Office of Pollution Prevention
and Toxics, Environmental Protection
Agency, Rm. E-531, 401 M St., SW.,
Washington, DC, 20460, (202) 554-1404,
TDD (202) 554-0551; e-mail: TSCA-
Hotline@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Under the provisions of TSCA, EPA is required to publish notice of receipt and status reports of chemicals subject to section 5 reporting requirements. The notice requirements are provided in TSCA sections 5(d)(2) and 5(d)(3). Specifically, EPA is required to provide notice of receipt of PMNs and TME application requests received. EPA also is required to identify those chemical submissions for which data has been received, the uses or intended uses of such chemicals, and the nature of any test data which may have been developed. Lastly, EPA is required to provide periodic status reports of all chemical substances undergoing review and receipt of notices of commencement.

A record has been established for this notice under docket number "[OPPTS-51922]" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 12 noon to 3 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA

Nonconfidential Information Center (NCIC), Rm. NEM-B607, 401 M St., SW., Washington, DC 20460.

Electronic comments can be sent directly to EPA at:
oppt.ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

In the past, EPA has published individual notices reflecting the status of section 5 filings received, pending or expired, as well as notices reflecting receipt of notices of commencement. In an effort to become more responsive to the regulated community, the users of this information and the general public, to comply with the requirements of TSCA, to conserve EPA resources, and to streamline the process and make it more timely, EPA is consolidating these separate notices into one comprehensive notice that will be issued at regular intervals.

In this notice, EPA shall provide a consolidated report in the **Federal Register** reflecting the dates PMN requests were received, the projected notice end date, the manufacturer or importer identity, to the extent that such information is not claimed as confidential and chemical identity, either specific or generic depending on whether chemical identity has been claimed confidential. Additionally, in this same report, EPA shall provide a

listing of receipt of new notices of commencement.

EPA believes the new format of the notice will be easier to understand by the interested public, and provides the information that is of greatest interest to the public users. Certain information provided in the earlier notices will not be provided under the new format. The status reports of substances under review, potential production volume, and summaries of health and safety data will not be provided in the new notices.

EPA is not providing production volume information in the consolidated notice since such information is generally claimed as confidential. For this reason, there is no substantive loss to the public in not publishing the data. Health and safety data are not summarized in the notice since it is recognized as impossible, given the format of this notice, as well as the previous style of notices, to provide meaningful information on the subject. In those submissions where health and safety data were received by the Agency, a footnote is included by the Manufacturer/Importer identity to indicate its existence. As stated below, interested persons may contact EPA directly to secure information on such studies.

For persons who are interested in data not included in this notice, access can be secured at EPA Headquarters in the NCIC at the address provided above. Additionally, interested parties may telephone the Document Control Office at (202) 260-1532, TDD (202) 554-0551, for generic use information, health and safety data not claimed as confidential or status reports on section 5 filings.

Send all comments to the address listed above. All comments received will be reviewed and appropriate amendments will be made as deemed necessary.

This notice will identify: (I) PMNs received; and (II) Notices of Commencement to manufacture/import.

I. 80 Premanufacture Notices Received From: 12/17/98 to 12/31/98

Case No.	Received Date	Projected Notice End Date	Manufacturer/Importer	Use	Chemical
P-99-0270	12/17/98	03/17/99	CIBA Specialty Chemicals Corporation	(G) Polymer intermediate for the manufacture of optical devices	(G) Pentyl 2,5-bis[[4-[[substituted]] benzoyl]oxy]-benzoate

BILLING CODE 6560-50-F

FEDERAL MARITIME COMMISSION**Notice of Agreement(s) Filed**

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984.

Interested parties can review or obtain copies of agreements at the Washington, DC office of the Commission, 800 North Capitol Street, NW, Room 962.

Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 217-011628-001.

Title: The Kawasaki Kisen Kaisha, Ltd. and Nippon Yusen Kaisha Space Charter Agreement.

Parties: Kawasaki Kisen Kaisha, Ltd. ("KL"), Nippon Yusen Kaisha ("NYK").

Synopsis: The proposed modification requires that any unused space allocated to NYK may be used by KL without additional compensation, that all vessel operating costs shall be for the account of KL, deletes authority for the parties to enter into agreements with marine terminal and stevedore operators, and

provides for agreement on other operational and termination procedures.

Agreement No.: 224-201067.

Title: Gateway Terminals Operating Agreement.

Parties: Carolina Stevedoring Company, Inc., Cooper/T. Smith Stevedoring Co. Inc., Ceres Marine Terminals, Inc.

Synopsis: The parties are to pool labor and share expenses for providing TIR functions (inspection of carrier owned containers and chassis for damage) at the port of Savannah. The proposed agreement is to operate through the entity, Gateway Terminals, L.L.C., a company jointly owned in equal shares by the three members of the agreement. The term of the agreement is open ended and the agreement will be considered active until the parties advise the Federal Maritime Commission of the termination of the agreement.

Dated: January 28, 1999.

By Order of the Federal Maritime Commission.

Bryant L. VanBrakle,

Secretary.

[FR Doc. 99-2475 Filed 2-2-99; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL MARITIME COMMISSION**Ocean Freight Forwarder License; Revocations**

The Federal Maritime Commission hereby gives notice that the following freight forwarder licenses have been revoked pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. app. 1718) and the regulations of the Commission pertaining to the licensing of ocean freight forwarders, effective on

the corresponding revocation dates shown below:

License Number: 4007.

Name: Bay Area Matrix, Inc.

Address: 14275 Catalina Street, San Leandro, CA 94577.

Date Revoked: January 1, 1999.

Reason: Surrendered license voluntarily.

License Number: 4446.

Name: Gunter Wegner d/b/a PACAT

International.

Address: 510 Plaza Drive, Suite 2240-D, Atlanta, GA 30349.
