Foreign-Trade Zones Board

[Docket 4-99]

Foreign-Trade Zone 31, Granite City, Illinois Application for Subzone; Clark Refining & Marketing, Inc. (Oil Refinery Complex) Hartford, Illinois

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Tri-City Regional Port District, grantee of FTZ 31, requesting special-purpose subzone status for the oil refinery complex of Clark Refining & Marketing, Inc., located in Hartford, Illinois. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on February 1, 1999.

The refinery complex (400 acres) is located at two sites in Hartford, Illinois (Madison County), some 15 miles northeast of St. Louis, Missouri: *Site 1* (65,000 BPD capacity, 240 acres) main

refinery complex and storage facility (72 tanks, 2 million barrel capacity), located at 201 E. Hawthorne; *Site 2* (160 acres)—river dock and three connecting pipelines, located west of the refinery on the Mississippi River.

The refinery (300 employees) is used to produce fuels and petrochemical feedstocks. Fuel products include gasoline, jet fuel, distillates, residual fuels, and motor fuel blendstocks. Petrochemical feedstocks and refinery by-products include propane, propylene, ethylene, butane, butylene, butadiene, liquified natural gas, benzene, toluene, xylene, carbon black oil, petroleum coke, sulfur and asphalt. Some 75 to 80 percent of the crude oil (90 percent of inputs) and some motor fuel blendstocks are sourced abroad.

Zone procedures would exempt the refinery from Customs duty payments on the foreign products used in its exports. On domestic sales, the company would be able to choose the Customs duty rates that apply to certain petrochemical feedstocks and refinery by-products (duty-free) by admitting incoming foreign crude oil and natural gas condensate in non-privileged foreign status. The duty rates on inputs range from 5.25¢/barrel to 10.5¢/barrel. The application indicates that the savings from zone procedures would help improve the refinery's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is April 12, 1999. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to April 27, 1999.

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:
