The Petitioner also requested that a public hearing be held to discuss this matter in the Washington, D.C. area.

By letter dated November 9, 1998, the UCS also submitted a Petition pursuant to 10 CFR 2.206 requesting that the Perry Nuclear Power Plant be immediately shut down and its operating license suspended or modified until the facility's design and licensing basis were updated to permit operation with failed fuel assemblies, or until all failed fuel assemblies were removed from the reactor core. The Petitioner also requested a public hearing in the Washington, D.C. area.

NUCLEAR REGULATORY COMMISSION

Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

Revision 1 of Regulatory Guide 3.54, "Spent Fuel Heat Generation in an Independent Spent Fuel Storage Installation," has been revised to present a method that is acceptable to the NRC staff for calculating heat generation rates for use as design input for an independent spent fuel storage installation. The procedures proposed in this guide, for both boiling water reactors and pressurized water reactors, are simpler and therefore are expected to be more useful to applicants and reviewers.

Comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time. Written comments may be submitted to the Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Single copies of regulatory guides may be obtained free of charge by writing the Reproduction and Distribution Services Section, OCIO, U.S. Nuclear Regulatory

Commission, Washington, DC 20555-0001, or by fax at (301) 415-2289.

Issued guides may also be purchased from the National Technical Information Service on a standing order basis.
