#### I. Background

On September 29, 1998, the United States Department of Justice ("the Department") filed the Complaint in this matter. The Complaint alleges that the proposed merger of Halliburton Company ("Halliburton") and Dresser Industries, Inc. ("Dresser") would combine two of only four companies that provide logging-while-drilling ("LWD") tools and services for oil and natural gas drilling and are the only sources of current and likely future innovations in new or improved LWD tools. LWD tools provide data during drilling for oil on the type of formation being drilled, whether there is oil in the formation, and the ease with which the oil can be extracted from the formation. LWD tools are mounted on the drill string and measure and transmit data while the drilling is ongoing that allow the drillers to determine if changes should be made in the drilling. Also mounted on the drill string with LWD tools are measurement-while-drilling ("MWD") tools. MWD tools measure and transmit data while the drilling is ongoing about the direction and angle of the drill bit. Because it is necessary that LWD tools and MWD tools be compatible, customers who want to use both types of tools on a particular drilling project usually obtain them from the same company. The proposed merger would reduce competition and likely lead to higher prices for LWD services, reduce LWD service quality, and slow the pace of LWD-related innovation, in violation of Section 7 of the Clayton Act, 15 U.S.C.A. 18 (1997). Simultaneously with the filing of the Complaint, the Plaintiff filed the
