Amendment of Class E Airspace; Leadville, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Leadville, CO, Class E airspace by providing additional controlled airspace to accommodate the development of a new Standard Instrument Approach Procedures (SIAP) utilizing the Global Positioning System (GPS) at the Lake County Airport.

EFFECTIVE DATE: 0901 UTC, May 20, 1999.

SUPPLEMENTARY INFORMATION:

History

On June 2, 1998, the FAA proposed to amend Title 14, Code of Federal Regulations, part 71 (14 CFR part 71) by revising the Leadville, CO, Class E airspace area (63 FR 53319). This revision provides the additional airspace necessary to encompass the GPS Runway 16 SIAP for the Lake County Airport.

Interested parties were invited to participate in the rulemaking proceeding by submitting written comments on the proposal. No comments were received.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface of the earth, is published Paragraph 6005, of FAA Order 7400.9F, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 modifies Class E airspace at Leadville, CO, by providing the additional airspace at Lake County Airport. This modification of airspace enlarges the 700-foot Class E area to meet current criteria standards to accommodate the landing and the holding procedures for the SIAP. The intended effect of this rule is designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under Instrument Flight Rules (IFR) at the Lake County Airport and between the terminal and en route transition stages.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Rockland, ME**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: This notice confirms the effective date of a direct final rule which revises the Class E airspace area at Rockland, ME, due to the relocation of the Sprucehead Non-Directional Beacon (NDB) and to provide adequate controlled airspace for two new standard instrument approaches to the Rockland, Knox County Regional Airport (KRKD).

EFFECTIVE DATE: The direct final rule published at 63 FR 71218 and corrected to read as published at 64 FR 3835, is effective 0901 UTC, January 28, 1999.

The FAA uses the direct final rulemaking procedure for a non-controversial rule

where the FAA believes that there will be no adverse public comment. This direct final rule advised the public that no adverse comments were anticipated, and that unless a written adverse comment, or a written notice of intent to submit such an adverse comment, were received within the comment period, the regulation would become effective on January 28, 1999. No adverse comments were received, and thus this notice confirms that this direct final rule became effective on that date.
