DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 902

[AK–007–FOR, Amendment No. VII]

Alaska Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is approving a proposed amendment to the Alaska regulatory program (hereinafter, the “Alaska program”) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Alaska proposed revisions to its regulations pertaining to general permitting requirements, general permit application information requirements, environmental resource information requirements, reclamation and operation plan requirements, permitting for special categories of mining, coal exploration, self-bonding requirements, performance standards, and general provisions, and included numerous editorial and recodification changes. The amendment was intended to revise the Alaska program to provide additional safeguarded, to clarify the Alaska program to provide the Alaska program can be found in the March 23, 1983, Federal Register (48 FR 12274). Subsequent actions concerning Alaska’s program and program amendments can be found at 30 CFR 902.15 and 902.16.

II. Proposed Amendment

By letter dated July 30, 1998, Alaska submitted a proposed amendment to its program (amendment No. VII, administrative record No. AK–07–01) pursuant to SMCRA (30 U.S.C. 1201 et seq.). Alaska submitted the proposed amendment at its own initiative. The provisions of the Alaska Surface Coal Mining Program Regulations that Alaska proposed to revise were: 11 Alaska Administrative Code (AAC) 90.002(a), (b), and (c), responsibilities, and 11 AAC 90.011(a)(1) and (2), permit fees, as provided in Article 2, General Permitting Requirements; 11 AAC 90.025(a)(2), (b), and (c), authority to enter and ownership information, as provided in Article 3, General permit Application Information Requirements; 11 AAC 90.045(a)(1) and (2), geology description, and 11 AAC 90.049(a), (a)(1), (2), and (a)(2)(C) through (H), surface water information, as provided in Article 4, Environmental Resource Information Requirements; 11 AAC 90.083(b)(9) and (11), reclamation plan general requirements, and 11 AAC 90.097, transportation facilities, as provided in Article 5, Reclamation and Operation Plan; 11 AAC 90.149(d) and (d)(1), operations near alluvial valley floors, as provided in Article 7, Permitting for Special Categories of Mining; 11 AAC 90.163(a) and (d), exploration that substantially disturbs the natural land surface or occurs in an area designated unsuitable for surface coal mining, as provided in Article 8, Exploration; 11 AAC 90.207(f), self-bonding requirements, as provided in Article 10, Bonding; 11 AAC 90.337(f), impoundment inspection, 11 AAC 90.375(f), public notice of blasting, 11 AAC 90.391(h)(1) and (2) and (s), disposal of excess spoil and coal mine waste, 11 AAC 90.401(e), coal mine waste, refuse pile, 11 AAC 90.407(e), coal mine waste, dams and embankments, 11 AAC 90.423(b) and (h), protection of fish and wildlife, 11 AAC 90.443(d)(1), (k), and (k)(1) and (2), backfilling and grading, and 11 AAC 90.491(e), (f), and (f)(1) and (2), construction and maintenance of roads, transportation and support facilities, and utility installations, as provided in Article 11, Performance Standards; and 11 AAC 90.901(e), applicability, 11 AAC 90.907(f), and (l), public participation, and 11 AAC 90.911(92), definition of “road,” as provided in Article 17, General Provisions.

Specifically, Alaska proposed numerous editorial and recodification changes for the purpose of clarity and in order to be consistent with the requirements of the State’s “Drafting Manual for Administrative Regulations” (1995 edition). Alaska also prepared 11 AAC 90.049(a)(2)(G) to require that water quality data show acidity information if there is potential for acid drainage from the proposed mining operation, and at 11 AAC 90.207(f)(2) to apply certain provisions for self-bonding, including criteria that must be met by the self-bond guarantor.

OSM announced receipt of the proposed amendment in the August 11, 1998, Federal Register (63 FR 42774), provided an opportunity for a public hearing or meeting on its substantive adequacy, and invited public comment on its adequacy (administrative record No. AK–07–02). Because no one requested a public hearing or meeting, none was held. The public comment period ended on September 10, 1998.

III. Director’s Findings

As discussed below, the Director, in accordance with SMCRA and 30 CFR 732.15 and 732.17, finds that the proposed program amendment submitted by Alaska on July 30, 1998, is no less effective than the corresponding Federal regulations. Accordingly, the Director approves the proposed amendment.

1. Nonsubstantive Revisions to Alaska’s Surface Coal Mining Program Regulations

Alaska proposed revisions to the following previously-approved provisions of the Alaska surface coal mining program regulations that are nonsubstantive in nature. These proposed revisions consist of recodification and/or wording changes made to reflect contemporary writing style and/or make the State’s provisions clearer or more specific. The corresponding Federal regulation provisions are listed in parentheses.

11 Alaska Administrative Code (AAC) 90.002(a), (b), and (c), responsibilities under general permitting requirements (30 CFR Part 772 and 773.11);
11 AAC 90.011 (1) and (2), permit fees (30 CFR 777.17);
11 AAC 90.025(a)(2), (b), and (c), authority to enter and ownership information (30 CFR 778.13(h) and 778.15(a) and (b));
11 AAC 90.045(a)(1) and (2), geology description (30 CFR 780.22(b)(1));
11 AAC 90.049(a)(1), (2), (2)(C), (D), (F), and (H), surface water information (30 CFR 780.21(b)(2) and 784.14(b)(2));
approves these proposed regulations.

Federal regulations. The Director finds that proposed AAC 90.207(f)(2) is not no less effective than the counterpart Federal regulation at 30 CFR 800.23(b)(1) which sets out the conditions under which the State may accept a written guarantee from a parent corporation guarantor of the permittee. Alaska proposed to revise its regulation at AAC 90.207(f)(2) which requires the permittee to immediately notify the Commissioner of the Department of Natural Resources the requirement that an individual or the guarantor no longer meets the specific criteria for approval of a self-bond guarantee.

In addition, Alaska proposed new definitions for self-bond and the guarantor no longer meets the specific criteria for approval of a self-bond guarantee. Alaska proposed to revise its regulation at AAC 90.207(f)(2) which requires the permittee to immediately notify the Commissioner of the Department of Natural Resources the requirement that an individual or the guarantor no longer meets the specific criteria for approval of a self-bond guarantee.

For the above reasons, the Director finds that the proposed revisions at 11 AAC 90.207(f)(3) and (8) are no less effective than the counterpart Federal regulations. Accordingly, the Director approves the proposed revisions to this regulation.

2. Substantive Revisions to Alaska's Surface Coal Mining Program Regulations That Are Substantively Identical to the Corresponding Provisions of the Federal Regulations

Alaska proposed revisions to the following regulations that are substantive and contain language that is substantially identical to the requirements of the corresponding Federal regulations (listed in parentheses):

- 11 AAC 90.049(a)(2)(E) and (G), surface water information (30 CFR 780.21(b)(2) and 784.14(b)(2)); and
- 11 AAC 90.207(f)(4), (5), (5)(A), (B), (C), and (D), (6), (7), and (7)(A) and (B); self-bonding (30 CFR 800.23(d), (e) through (4), (f), and (g)).

Because these proposed Alaska regulations are substantively identical to the corresponding provisions of the Federal regulations, the Director finds that they are no less effective than the Federal regulations. Accordingly, the Director approves them.

3. 11 AAC 90.207(f)(2)(A) and (B), Self-bonding and the Written Guarantee From a Parent Corporation Guarantor of the Permittee

Alaska proposed to revise its regulation at AAC 90.207(f)(2) which requires the permittee to immediately notify the Commissioner of the Department of Natural Resources the requirement that an individual or the guarantor no longer meets the specific criteria for approval of a self-bond guarantee.

For this reason, the Director finds that proposed AAC 90.207(f)(2) is not inconsistent with conditions imposed on prospective guarantors in the counterpart Federal regulation at 30 CFR 800.23(c)(1). Therefore, the Director finds that proposed AAC 90.207(f)(2) is no less effective than the counterpart Federal regulation at 30 CFR 800.23(c)(1) and approves it.

4. 11 AAC 90.207(f)(3)(A) and (B) and (f)(8)(A) Through (H), Definitions for the Term "Self-bond" and Other Financial Terms Used to Describe Self Bonds

On September 17, 1996, OSM at 30 CFR 902.16(b)(1) (finding No. 6, 61 FR 48835, 48837) required Alaska to revise 11 AAC 90.207(f)(3) to require the applicant for a self-bond that is guaranteed by a corporate guarantor to retain his or her own agent for service in Alaska and to further revise 11 AAC 90.207(f) to add definitions for the term "self-bond" and other financial terms used to describe self bonds.

In response to the required amendment, Alaska revised 11 AAC 90.207(f)(3) by referencing as a condition for acceptance by the Commissioner of the Department of Natural Resources the requirement that the applicant for a self-bond that is guaranteed by a corporate guarantor retain an agent for service in Alaska. The proposed revision is consistent with the counterpart Federal regulation at 30 CFR 800.23(c)(2), which provides the specific criteria for approval of a self-bond guaranteed by a corporate guarantor.

In addition, Alaska proposed new regulations at 11 AAC 90.207(f)(8)(A) through (H) that provide definitions of the terms ‘‘self-bond,’’ ‘‘current assets,’’ ‘‘current liabilities,’’ ‘‘fixed assets,’’ ‘‘liabilities,’’ ‘‘net worth,’’ ‘‘parent corporation,’’ and ‘‘tangible net worth.’’ The proposed definitions contain language that is substantively identical to the requirements of the corresponding Federal regulations at 30 CFR 800.5 and 800.23(a).

For the above reasons, the Director finds that the proposed revisions at 11 AAC 90.207(f)(3) and (8) are no less effective than the counterpart Federal regulations. Accordingly, the Director approves the proposed revisions to this regulation.

5. 11 AAC 90.337(f), Impoundment Inspection

Alaska proposed at 11 AAC 90.337(f) new language that requires, in addition to the formal inspections required under paragraphs (a) through (e) of section 11 AAC 90.337, that each examination must be performed at least once in each three-month period.” that “the examination must be performed at a qualified person, and that “the person making the examination required by this subsection shall examine the impoundment” for any appearances of structural weakness “and for” other hazardous conditions.

The Federal regulations at 30 CFR 816.49(a)(12) and 817.49(a)(12) require, in pertinent part, that impoundments not meeting the SCS (Soil Conservation Service, now Natural Resources Conservation Service) class B or C criteria for dams in TR-60 (Technical Release No. 60, “Earth Dams and Reservoirs,” 210-VI-TR60, October
1985), or subject to 30 CFR 77.216–3, shall be examined at least quarterly. Alaska's proposed revision at 11 AAC 90.337(f) requires "each impoundment" to be examined quarterly, whether or not the impoundment meets the established NRCS criteria, which results in a more stringent standard in Alaska's coal mining regulatory program than is provided for in the counterpart Federal regulations at 30 CFR 816.49(a)(12) and 817.14(a)(12). 30 CFR 730.11(b) provides, in pertinent part, that any State law or regulation which provides for more stringent land use and environmental controls and regulations of coal exploration and surface coal mining and reclamation operations than do the provisions of SMCRA and Chapter VII of the implementing Federal regulations, shall not be construed to be inconsistent with SMCRA or Chapter VII. Therefore, the Director finds that 11 AAC 90.337(f) is no less effective than the Federal regulations and approves the proposed revisions to Alaska's regulation.

6. 11 AAC 90.443(k), Backfilling and Grading

Alaska proposed new language at 11 AAC 90.443(k) to provide that "the operator shall return all spoil to the mined-out area," and to provide that "the requirements of this subsection [(k)] do not apply to (1) spoil disposed of in accordance with 11 AAC 90.391, and (2) spoil necessary to blend regraded areas into the surrounding terrain in non-steep slope areas if all vegetative and organic material is first removed from the areas that are to be covered." The counterpart Federal regulations at 30 CFR 816.102(b) and 817.102(b) provide that spoil, except excess spoil disposed of in accordance with 30 CFR 816.71 through 816.74 and 817.71 and 817.74, respectively, shall be returned to the mined-out area. In addition, 30 CFR 186.102(d) and 187.102(d) provide that spoil may be placed on the area outside the mined-out area in non-steep slope areas to restore the appropriate original contour by blending the spoil into the surrounding terrain if certain requirements are met including removal of all vegetative and organic material, removal, segregation, storage, and redistribution of spoil, and backfilling and grading of the spoil in accordance with the requirements of 30 CFR 816.102 and 817.102.

The Director, in finding No. 14 of the final rule Federal Register notice approving Alaska's amendment No. IV (see 61 FR 48835, 48839, 48843, September 17, 1996), placed a required amendment on the Alaska program at 30 CFR 902.16(b)(7). In effect, the Director required Alaska to revise 11 AAC 90.443(k) to provide that the topsoil on the area outside the mined-out area in nonsteep slope areas shall be removed, segregated, stored and redistributed in accordance with the State's topsoil removal provisions and that the spoil be backfilled and graded on the area in accordance with the State's provisions concerning performance standards for backfilling and grading, or otherwise amend its program to ensure that the disposal of spoil provisions at 11 AAC 90.443(k) are no less effective than the Federal regulations at 30 CFR 816.102(d) and 817.102(d). The changes proposed by Alaska at 11 AAC 90.443(k) in this amendment (amendment No. VII) do not address the Director's requirement. To the extent that Alaska is proposing editorial changes in this regulation to reflect contemporary writing style, to be consistent with the State's requirements for writing regulatory language, and to make the State's provisions clearer or more specific, the Director finds that 11 AAC 90.443(k) is consistent with the Federal regulations. The Director approves this revised regulation, but adds a reminder that the State must further amend this provision as required at 30 CFR 902.16(b)(7).

7. 11 AAC 90.491(f), Construction and Maintenance of Primary Roads

In finding No. 1, the Director approved Alaska's proposed revisions at 11 AAC 90.491(f), (f)(1), (2), and (2)(A) through (H) because the changes were editorial and/or recodification. A separate finding for 11 AAC 90.491(f) is provided in this final rule document because Alaska's regulation still lacks provisions similar to those provided by the Federal regulations at 30 CFR 816.151(c)(2) and 817.151(c)(2). The Director, however, reminds Alaska that, as codified by the corrected required program at 30 CFR 902.16(b)(8), it must further amend 11 AAC 90.491(f) to provide for natural stream channels alterations or relocations and structures for perennial or intermittent stream channel crossings that are no less effective than 30 CFR 816.151(d)(5) and (6) and 817.151(d)(5).

IV. Summary and Disposition of Comments

Following are summaries of all substantive written comments on the proposed amendment that were received by OSM, and OSM's responses to them.

1. Public Comments

OSM invited public comments on the proposed amendment, but none were received.

2. Federal Agency Comments

Pursuant to 30 CFR 732.17(h)(11)(i), OSM solicited comments on the proposed amendment from various Federal agencies with an actual or potential interest in the Alaska program. The Bureau of Land Management, Alaska State Office (AK—BLM), responded in a memorandum dated August 20, 1998 (administrative record No. AK—07—05), that the changes proposed by Alaska were minor and amounted to restructuring sentences for the purpose of clarification, and that no changes to the regulatory meaning...
appeared to have been instituted. BLM offered an editorial query concerning 11 AAC 90.207(f)(2) and the phrase “not longer satisfied.”

OSM agrees with BLM’s editorial comment, and with this final rule document is notifying Alaska of the typographical error. The Director is approving the language at 11 AAC 90.207(f)(2) as provided in finding No. 2 above because the meaning of the requirement that the guarantor notify the permittee and the commissioner if its financial conditions change so that certain criteria are no longer met is not altered whether those criteria are “not longer satisfied” or “no longer satisfied.”

3. Environmental Protection Agency (EPA) Concurrence and Comments

Pursuant to 30 CFR 732.17(h)(11)(ii), OSM is required to solicit the written concurrence of EPA with respect to those provisions of the proposed amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 et seq.) or the Clean Air Act (42 U.S.C. 7401 et seq.). Pursuant to 30 CFR 732.17(h)(11)(i), OSM solicited comments on the proposed amendment from EPA (administrative record No. AK-07-03). EPA did not respond to OSM’s request.

4. State Historic Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Pursuant to 30 CFR 732.17(h)(4), OSM solicited comments on the proposed amendment from the SHPO and ACHP (administrative record No. AK-07-03). Neither SHPO nor ACHP responded to OSM’s request.

V. Director’s Decision

Based on the above findings, the Director approves Alaska’s proposed amendment as submitted on July 30, 1998.

The Director approves, as discussed in:

Finding No. 1, 11 AAC 90.002(a), (b), and (c), 11 AAC 90.011(1) and (2), 11 AAC 90.025(a)(2), (b), and (c), 11 AAC 90.045(a)(1) and (2), 11 AAC 90.049(a)(1), (2)(2)(C), (D), (F), and (H), 11 AAC 90.083(b)(9) and (11), 11 AAC 90.097, 11 AAC 90.149(d) and (d)(1), 11 AAC 90.163(a) and (d), 11 AAC 90.207(f)(1), (1)(A), (1)(A)(ii) and (ii), (B), (B)(i), (ii), and (iii), (C) and (C)(i), 11 AAC 90.375(f), 11 AAC 90.391(h)(1) and (2) and (s), 11 AAC 90.401(e), 11 AAC 90.407(e), 11 AAC 90.423(b) and (h), 11 AAC 90.443(d)(1), 11 AAC 90.491(e) and (f), (f)(1), (2), and (2)(A) through (H), 11 AAC 90.901(e), 11 AAC 90.907(c) and (j), and 11 AAC 90.911(92), concerning previously-approved provisions of the Alaska surface coal mining program regulations that contain revisions that are nonsubstantive in nature.

Finding No. 2, 11 AAC 90.049(a)(2)(E) and (G), and 11 AAC 90.207(f)(4), (5), (5)(A), (B), (C), and (D), (6), (7), and (7)(A) and (B), provisions of the Alaska surface coal mining program regulations that contain substantive revisions that are substantively identical to the requirements of the corresponding Federal regulations;

Finding No. 3, 11 AAC 90.207(f)(2)(A) and (B), concerning self-bonding and the written guarantee from a parent corporation guarantor of the permittee;

Finding No. 4, 11 AAC 90.207(f)(3)(A) and (B) and (f)(8)(A) through (H), concerning definitions for the term “self-bond” and other financial terms used to describe self bonds;

Finding No. 5, 11 AAC 90.337(f), concerning impoundment inspection;

Finding No. 6, 11 AAC 90.443(k), concerning backfilling and grading; and

Finding No. 7, 11 AAC 90.491(f), concerning construction and maintenance of primary roads.

The Federal regulations at 30 CFR part 902, codifying decisions concerning the Alaska program, are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Determinations

1. Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

2. Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

3. National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

4. Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 et seq.).

5. Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The State submittal that is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

6. Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

List of Subjects in 30 CFR Part 902

Intergovernmental relations, Surface mining, Underground mining.

James F. Fulton,
Acting Regional Director, Western Regional Coordinating Center.

For the reasons set out in the preamble, Title 30, Chapter VII,
Subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 902—ALASKA

1. The authority citation for part 902 continues to read as follows:
   Authority: 30 U.S.C. 1201 et seq.

2. Section 902.15 is amended in the table by adding a new entry in chronological order by “Date of Final Publication” to read as follows:

<table>
<thead>
<tr>
<th>Original amendment submission date</th>
<th>Date of final publication</th>
<th>Citation/description</th>
</tr>
</thead>
<tbody>
<tr>
<td>July 30, 1998</td>
<td>February 22, 1999</td>
<td>11 AAC 90.002(a), (b), and (c), and 90.011(a) concerning permitting requirements; 90.025(a), (b), and (c) concerning permit application requirements; 90.045(a), 90.049(a), 90.083(b), and 90.097 concerning environmental resource requirements; 90.149(d) concerning alluvial valley floors; 90.163(a) and (d) concerning exploration; 90.207(f) concerning self-bonding; 90.337(f) concerning impoundment inspections; 90.375(f) concerning blasting; 90.391(h) and (s), 90.401(e), and (h) concerning fish and wildlife; 90.443(d) and (k) concerning backfilling and grading; 90.491(e) and (f) concerning roads; 90.901(e) concerning termination of jurisdiction; 90.907(c) and (j) concerning public availability of information; and 90.911(2) concerning the definition of “road.”</td>

BILLING CODE 4310–05–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 944
[SPATS No. UT–032–FOR]

Utah Abandoned Mine Land Reclamation Plan

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is approving a proposed amendment to the Utah abandoned mine land reclamation (AMLR) plan (hereinafter referred to as the “Utah plan”) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Utah proposed revisions to, and the addition of rules pertaining to, the definitions of certain terms, general reclamation requirements for coal lands and water, eligible lands and water prior to certification, certification of completion of coal sites, eligible lands and water subsequent to certification, the exclusion of certain noncoal reclamation sites, the extension of land acquisition authority and lien requirements to noncoal sites, limited liability, contractor responsibility, and other facilities; Utah Admin. R. 643–874–140 through ±144, Utilities and other facilities; Utah Admin. R. 643–874–150, Limited liability; Utah Admin. R. 643–874–160, Contractor responsibility; Utah Admin. R. 643–875–120 and ~122 through ~126, Eligible lands and water prior to certification (non-coal); Utah Admin. R. 643–875–130 through ~133, Certification of completion of coal sites; Utah Admin. R. 643–875–140 through ~142, Eligible lands and water subsequent to certification (non-coal); Utah Admin. R. 643–875–150 through ~155.700, Reclamation priorities for noncoal program; Utah Admin. R. 643–875–160, Exclusion of certain noncoal reclamation sites; Utah Admin. R. 643–875–170, Land acquisition authority–noncoal; Utah Admin. R. 643–875–180, Lien requirements; Utah Admin. R. 643–875–190, Limited liability; Utah Admin. R. 643–875–200, Contractor responsibility; Utah Admin. R. 643–
