Purpose: The National Institute for Occupational Safety and Health is requesting public participation in a workshop being co-sponsored with the U.S. Army—Soldiers and Biological Chemical Command and the Occupational Safety and Health Administration. The agencies are bringing together subject matter experts and stakeholders with common interests and concerns for the respiratory protection needs of emergency responders. This workshop will provide a forum to exchange information and learn about current respiratory protection issues associated with incidents involving nuclear, biological, and/or chemical agents. Participants are encouraged to provide and share the results from any testing or evaluations of respirators for potential use against these agents. The objectives of this meeting are (1) to identify and understand the hazards associated with a nuclear,

biological and/or chemical incident; (2) identify the different responders and their respiratory protection needs; (3) determine which respirators are currently being utilized for response to these types of events and the selection criteria; and (4) determine public health and medical community concerns which must be considered in developing a standard for chemical and biological respiratory protective devices. After the conclusion of the workshop, a Workshop Report summarizing information and discussions will be provided to all participants. The Workshop Report will be available upon request and may be used by attendees to form future partnerships and collaborations to address this emerging national issue.
