[Airspace Docket No. 99-AGL-14]

Proposed Modification of Class D Airspace and Class E Airspace; Wilmington, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to modify Class D airspace and Class E airspace at Wilmington, OH. This action would correct technical errors in the legal descriptions of the Class D airspace and the Class E airspace extension to the Class D airspace for Airborne Airpark, and amend the Class E surface area for the airport to include the Class E airspace extension. The purpose of these actions is to make technical corrections to the airspace legal descriptions in order to make the Class D airspace and Class E airspace for the airport consistent with each other, and to provide adequate controlled airspace for instrument approach procedures when the airport traffic control tower (ATCT) is closed.

DATES: Comments must be received on or before April 20, 1999.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, AGL-7, Rules Docket No. 99-AGL-14, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Assistant Chief Counsel, Federal Aviation

Administration, 2300 East Devon Avenue, Des Plaines, Illinois. An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class D and associated Class E airspace at Wilmington, OH, by making technical corrections to the legal descriptions of the Class D airspace and the Class E airspace extension to the Class D airspace for Airborne Airpark, and by amending the Class E surface area for the airport to include the Class E extension to the surface area. Controlled airspace extending upward from the surface is needed to contain aircraft executing instrument approach procedures. The area would be depicted on appropriate aeronautical charts. Class D airspace designations are published in paragraph 5000, Class E airspace areas designated as an extension to a Class D surface area are published in paragraph 6004, and Class E airspace areas designated as a surface area for an airport are published in paragraph 6002 of FAA Order 7400.9F dated September 10, 1998, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an establishment body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
