Title: Section 73.3598, Period of Construction.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions.

Number of Respondents: 100.

Estimated Time Per Response: 0.5 hours per response.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 38 hours.

Total Annual Cost: \$28,500.

Needs and Uses: On October 22, 1998, the Commission adopted a Report and Order in MM Docket Nos. 98-43 and 94-149. Among other things, this Report and Order extended the time to complete construction of a new broadcast station or a modification to a licensed station to three years. This new construction period will provide all permittees an adequate and realistic time to construct their facilities and will result in the elimination of requests for additional time to construct. The Commission will toll the construction period only when construction is encumbered due to an act of God, or when a construction permit is the subject of administrative or judicial review. This Report and Order adopted a notification procedure to be used for notifying the Commission that a permit

is subject to tolling. The FCC Form 307, Application for Extension of Broadcast Construction Permit or to Replace Expired Construction Permit, will be abolished.

Specifically, when a permit is subject to tolling because construction is encumbered due to an act of God, or when a construction permit is the subject of administrative or judicial review, Section 73.3598 requires a permittee to notify the Commission as promptly as possible and, in any event, within 30 days, and to provide supporting documentation. Tolling resulting from an act of God will normally cease six months from the date of the notification. A permittee must also notify the Commission promptly when a relevant administrative or judicial review is resolved. Any construction permit for which construction has not been completed shall be automatically forfeited upon expiration of the construction permit.

The data are used by FCC staff to ensure that legitimate obstacles are preventing permittees from the construction of broadcast facilities.
