

Plant Health Inspection Service (APHIS) has initiated a program to eradicate the Asian longhorned beetle in Illinois and New York. The States of Illinois and New York are assisting APHIS in funding the program. However, APHIS resources are insufficient to meet the estimated \$5.5 million needed for the Federal share. In addition, some of these resources may be needed to fund other, small scale emergencies before the end of the year.

Therefore, in accordance with the provisions of the Act of September 25, 1981, 95 Stat. (7 U.S.C. 147b), I declare that there is an emergency which threatens the forest and maple syrup industries of this country and hereby authorize the transfer and use of such funds as may be necessary from appropriations or other funds available to the agencies or corporations of the United States Department of Agriculture for the conduct of a program to detect the Asian longhorned beetle, identify infested areas, control and prevent the spread of the Asian longhorned beetle to noninfested areas of the United States, and eradicate the Asian longhorned beetle wherever it may be found in the United States.

Effective Date: This declaration of emergency shall become effective March 9, 1999.

Dan Glickman,

Secretary of Agriculture.
