SUPPLEMENTARY INFORMATION:

Title: Criteria for Classification of Solid Waste Disposal Facilities and Practices, Recordkeeping and Reporting requirements—40 CFR Part 257, Subpart B.

OMB No.: 2050-0154.

Current expiration date: September 30, 1999.

Affected entities: EPA assumes that industrial waste units that previously co-disposed non-hazardous wastes and conditionally exempt small quantity generator (CESQG) hazardous waste on-site have ceased that practice and that commercial off-site industrial waste units are operating with stringent environmental controls in place. Therefore, entities that potentially will be affected by this action are limited to those that dispose of CESQG hazardous wastes in construction and demolition (C&D) waste landfills.

Abstract: In order to effectively implement and enforce final changes to 40 CFR Part 257—Subpart B on a State level, owners/operators of construction and demolition waste landfills that receive CESQG hazardous wastes will have to comply with the final reporting and recordkeeping requirements. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. This continuing ICR documents the recordkeeping and reporting burdens associated with location and ground-water monitoring provisions contained in 40 CFR part 257—subpart B.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and the clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond including through the use of appropriate automated electronic, mechanical, or other technological collection techniques of other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The annual burden to respondents for complying with the information collection requirements of part 257—subpart B Criteria is approximately 11, 000 hours per year, with an annual cost of \$393,000. The estimated number of respondents is 164 with an average annual burden of approximately 67 hours per respondent. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: March 9, 1999.

Acting Director, Office of Solid Waste.
