DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-35,124]

Twinstar Semiconductor, Richardson, Texas; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18(C) an application for administrative consideration was filed with the Acting Director of the Office of Trade Adjustment Assistance for workers at Twinstar Semiconductor located in Richardson, Texas. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-35,124; Twinstar Semiconductor
Richardson, Texas (March 24, 1999)

Signed at Washington, D.C. this 31st day of March, 1999.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Carolina Power & Light Company; H. B. Robinson Steam Electric Plant, Unit No. 2 Environmental Assessment and Finding of No Significant Impact

Docket No. 50-261

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License DPR-23 issued to Carolina Power and Light Company (the licensee) for operation of the H. B. Robinson Steam Electric Plant (HBRSEP), Unit 2, located at the licensee's site in Darlington County, South Carolina.

Environmental Assessment

Identification of the Proposed Action

The proposed action would amend the Facility Operating License to reflect a revision to the HBRSEP Updated Final Safety Analysis Report (UFSAR) to include the evaluation of a previously unanalyzed spent fuel cask drop scenario. The analysis also considered a second scenario of potential damage by lateral movement of the cask into plant equipment that results in damage to the valves while shipping with the valve covers removed. The cask drop scenario is hypothesized to occur during movement of spent fuel shipping cask model IF-300, without the cask valve covers installed, from the decontamination facility at the HBRSEP to the shipping railcar using a crane in a non-single-failure-proof configuration, i.e. using a non-redundant cask lifting yoke. The maximum potential height from which the cask could be dropped during the time of transfer with a non-redundant cask lifting yoke is 30 feet. The postulated accident associated with lateral movement of the cask could occur anytime during the general handling of the cask without the cask valve covers installed. The proposed action is in accordance with the licensee's request for NRC review dated August 28, 1997, as supplemented by letters dated June 17, 1998, October 29, 1998, and February 11, 1999.

The Need for the Proposed Action

At HBRSEP, Unit No. 2, loaded Spent Fuel Shipping Casks are shipped by rail
