

period, the spot market accounted for 77.66 percent of total purchases, and the long-term market for 22.34 percent.

As in previous determinations, the Department used the EIA's *Uranium Industry Annual* to determine the available average spot-and long-term volumes of U.S. utility purchases. We have updated the data to reflect the period 1994 through 1997. The EIA has withheld certain business proprietary contract data from the public versions of the *Uranium Industry Annual 1994*, *Uranium Industry Annual 1995*, *Uranium Industry Annual 1996* and the *Uranium Industry Annual 1997*. The EIA, however, provided all business proprietary data to the Department and the Department has used it to update its weighting calculation.

Calculation Announcement

The Department determined, using the methodology and information described above, that the observed market price is \$10.05. This reflects an average spot market price of \$9.58, weighted at 77.66 percent, and an average long-term contract price of \$11.72, weighted at 22.34 percent. This price will be used, as appropriate, to determine quota availability for purposes of Section IV.A. of the Uzbek agreement.

Dated: April 1, 1999.
