

- Relative activity of each isomer.
- Relative toxicology of each isomer (human health and environmental effects).
- Relative environmental fate of each isomer.

### C. Specific Questions for Commenters

1. Under what circumstances should the Agency register an isomeric AI purified for one or more (usually more chemically active isomers) as a new AI?

2. Under what circumstances should the Agency not register an isomeric AI purified for one or more (usually more chemically active isomers) as a new AI?

3. What would be the advantages or disadvantages to the regulated community, the Agency, growers, the environment, the general public, and other interest groups from your answer to questions 1. and 2.?

4. If isomerically purified AI's were not treated as new AI's but as new formulations, what incentives could the Agency create to promote these innovations?

5. What information might the Agency need for initial and subsequent registrations of isomeric AI's?

6. Under what circumstances should the Agency grant reduced risk pesticide status to an isomeric AI purified for one or more (usually more chemically active isomers)?
