The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend Class E airspace at Sanford, NC. The Sanford-Lee County Brick Field Airport has been relocated approximately 10 miles northeast and the name of the airport has been

changed to Sanford-Lee County Regional Airport. An ILS/DME RWY 3 SIAP has been developed for Sanford-Lee County Regional Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at Sanford-Lee County Regional Airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9F, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11035; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Barnesville, OH, to accommodate aircraft executing the proposed GPS Rwy 27 SIAP at Barnesville-Bradford Airport by modifying the existing controlled airspace. Controlled airspace extending upward from 700 to 1,200 feet AGL is needed to contain aircraft executing the approach. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9F dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1 The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this, proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Modification of Class E Airspace; Indianapolis, IN; and Proposed Revocation of Class E Airspace; Greenwood, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to modify the Class E airspace at Indianapolis, IN, and revoke the Class E airspace at Greenwood, IN. The legal description for the Class E airspace for the Greenwood Municipal Airport has been published in duplicate, once as part of the Indianapolis, IN, Class E airspace, and once as Greenwood, IN, Class E airspace. Neither legal description for the Class E airspace for the Greenwood Municipal Airport, as published, is correct. Because the Class E airspace for Greenwood Municipal Airport is an integral part of the Indianapolis, IN, Class E airspace area, this action proposes to modify the Class E airspace for Indianapolis, IN, to correctly describe the Class E airspace required for Greenwood Municipal
