BILLING CODE 7510-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323]

Pacific Gas and Electric Company (Diablo Canyon Nuclear Power Plant, Units 1 and 2); Exemption

I

Pacific Gas and Electric Company, et al. (the licensee) is the holder of Facility Operating License Nos. DPR-80 and DPR-82, which authorize operation of the Diablo Canyon Nuclear Power Plant (DCNPP), Units 1 and 2. The license provides, among other things, that the licensee is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The facility consists of two pressurized-water reactors at the licensee's site located in San Luis Obispo County, California.

II

Section 50.60 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Acceptance criteria for fracture prevention measures for lightwater nuclear power reactors for normal operation," paragraph (a) states, in part, that "all light-water nuclear power reactors, * * * must meet the fracture toughness and material surveillance program requirements for the reactor coolant pressure boundary set forth in appendices G and H to this part." Pressurized water reactor licensees have installed cold overpressure mitigation systems/low temperature overpressure protection systems (LTOP) in order to protect the reactor coolant pressure boundary from being operated outside of the boundaries established by the pressure temperature (P/T) limit curves and to provide pressure relief of the reactor coolant pressure boundaries during low temperature overpressurization events.

III

Section 50.12(a) of 10 CFR, "Specific exemption," states that * * *

The Commission may, upon application by any interested person, or upon its own initiative, grant exemptions from the requirements of the regulations of this part, which are: (1) Authorized by law, will not present an undue risk to the public health
