

State. To integrate the Tennessee Load Management Service with its operations, Granite State adopted a new Rate Schedule LMS which was a mirror of the Tennessee Load Management Service.

Granite State says that the foregoing arrangement for load balancing on its system worked well as long as Tennessee was the only upstream pipeline connected to its system. Lately, however, Granite State states that its system has been connected at two locations, in Westbrook, Maine, and Newington, New Hampshire, to the pipeline jointly owned by the Portland Natural Gas Transmission System (PNGTS) and Maritime and Northeast Pipeline, L.L.C. and PNGTS has commenced delivering gas to Granite State at these interconnections for further transportation and delivery to customers directly connected to the Granite State system. It is further stated that Maritimes is forecasting an in-service date of November, 1999, for the pipeline facilities authorized in Docket Nos. CP96-809, *et al.*

According to Granite State the revisions in its Rate Schedule LMS methodology are necessary because Granite State is now an intervening pipeline between Point Operators and OBA holders in its system and three (3) upstream pipelines. Granite State further states that the revisions in its Load Management Service which it proposes will pass through to the Point Operators and OBA holders on its system the settlements with upstream pipelines for delivery imbalances so that Granite State neither gains nor loses in the settlement process.

Granite State states that copies of its filing have been served on its firm and interruptible customers and on the regulatory agencies of the states of Maine, Massachusetts and New Hampshire.
