**NUCLEAR REGULATORY COMMISSION**

[Docket No. 40-8912]

**Grace Estate****AGENCY:** Nuclear Regulatory Commission.**ACTION:** Notice of opportunity for hearing concerning termination of source materials license SUA-1480 and release of the three grace sites in New Mexico for unrestricted use.

**SUMMARY:** Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has accepted the Final Reclamation Report, submitted by the firm of Comeau, Maldegen, Templeman & Indall, LLP (CMT&I), representing the estate of Michael P. Grace, documenting the reclamation of the three Grace sites in New Mexico. Site 1 is located approximately 20 miles northeast of Gallup, New Mexico. Site 2 is located near Bibo, New Mexico. Site 3 is located approximately 20 miles northwest of Magdalena, New Mexico. An Environmental Assessment (EA) was performed by the NRC staff in support of its review of the Grace Estate's reclamation plan, in accordance with the requirements of Title 10, Code of Federal Regulations (10 CFR) part 51. The conclusion of the EA was a Finding of No Significant Impact (FONSI) for the proposed site reclamation.

The NRC staff has determined that reclamation of the sites was performed in accordance with Amendment No. 1 to Source Materials License SUA-1480, which authorized the licensee, the estate of Michael P. Grace (CMT&I), to perform radiological cleanup and surface reclamation of three non-operating uranium extraction sites in New Mexico. Based on this determination, and in accordance with the licensee's request, Source Materials License SUA-1480 is hereby terminated and the three sites are released for unrestricted use.

**Thermal Science, Inc.; Order Imposing Civil Monetary Penalty****I**

Thermal Science, Inc. (TSI) is the manufacturer and vendor of fire barrier products known generally as Thermo-Lag. TSI began marketing this product in the early 1980s to licensees of the United States Nuclear Regulatory Commission (NRC) for use in nuclear power plants. TSI represented that Thermo-Lag had undergone independent testing by Industrial Testing Laboratories, Inc. (ITL). Using ITL stationery, TSI issued reports in ITL's name, making it appear that the reports were written by ITL, when in fact they were written by TSI. Many NRC licensees thereafter purchased Thermo-Lag to meet the NRC's fire protection requirements, codified in 10 CFR 50.48 and appendix R to part 50.

**II**

In 1989 the NRC began receiving licensee reports of problems with installed Thermo-Lag. As part of a subsequent NRC investigation, TSI was questioned in the fall of 1991 about the testing and installation of Thermo-Lag. TSI continued to represent that its product had been independently tested by ITL. However, during an NRC inspection of TSI's facility in December
