

endangered species program. To help guide recovery efforts, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the recovery measures needed. The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during the public comment period prior to approval of each new or revised recovery plan. Substantive technical comments will result in changes to the plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individualized responses to comments will not be provided. The six species of plants covered in the draft recovery plan are primarily restricted to gabbro soils habitat in the central Sierra Nevada foothills of California. Conversion of habitat to urban uses has extirpated the listed species and species of concern from a significant portion of their historic ranges. The remaining natural communities are highly fragmented, and many are marginal habitats in which these species may not persist during catastrophic events. The objectives of this recovery plan are two-fold: (1) to delist the plants Stebbin's morning-glory, Pine Hill ceanothus, Pine Hill flannelbush, El Dorado bedstraw, and Layne's butterweed by protecting, enhancing, restoring, and appropriately managing their habitat; and (2) to ensure the long-term conservation of the one species of concern, El Dorado mule-ears, that occurs in the same gabbro soils habitats with the listed species.

Public Comments Solicited

The Service solicits written comments on the draft recovery plan described. All comments received by the date specified above will be considered prior to approval of this plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Non-Federal Land

In addition, if the following described non-federal land is acquired by the United States,

the land will be subject to the terms and conditions of this withdrawal:

T. 1 S., R. 26 E.,

Sec. 1, NW $\frac{1}{4}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$.

The area described contains approximately 10 acres in Yellowstone County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Montana State Director of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Montana State Director within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are hiking, picnicking, bird watching, vegetation inventories, environmental education, and other such activities that do not result in surface disturbance, but only with the approval of unauthorized officer of the Bureau of Land Management.

Dated: April 30, 1999.
