**ACTION:** Reopening and Extension of Time for Filing Comments.

**SUPPLEMENTARY INFORMATION:**

Prior documents in this proceeding:

Proposed Rule: Issued April 14, 1999; published April 19, 1999 (64 FR 19071).

Notice is hereby given that the time for filing comments on the proposed revision of the percentage of a supply plant's receipts that must be delivered to fluid milk plants to qualify a supply plant for pooling under the Iowa Federal milk order is hereby reopened and extended. The comment period closed on April 26, 1999. Comments concerning the months of June, July, and August will now be accepted through June 14, 1999.

On the basis of the original request for revision and one comment filed in partial support of the proposed revision, USDA is reducing the supply plant shipping percentages by 10 percentage points for the months of April and May, and by 5 percentage points for the month of June. These revisions concerning supply plant shipping percentages are published separately in the **Federal Register**. A reduction of 10 percentage points for the months of April through August 1999 was requested by Beatrice Cheese, Inc. A comment, filed on behalf of Anderson-Erickson Dairy Company, argued that the milk supply situation in the Iowa market is too volatile at present to be able to determine whether the requested reduction in the pool supply plant shipping percentage for the months of June, July, and August is appropriate. Therefore, a decision on whether to revise the shipping percentage for the months of July and August and to further revise the shipping percentage for the month of June will be made after the close of the reopened comment period.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).
