Title: Investigation into Possible Noncompliance of Motor Vehicles with Federal Emission Standards. (EPA ICR No. 222.04, OMB Control No. 2060-0086). This is a request for extension of a currently approved collection.

Abstract: This information collection includes three instruments that are used by the U.S. EPA to identify motor vehicles and engines for possible inclusion in its emissions control testing programs. The self-addressed postcard and owner telephone questionnaire are completed using information given by owners of vehicles or engines from a vehicle class under investigation. The maintenance verification form is administered to representatives of service facilities that performed maintenance on vehicles or engines whose owners have responded to the owner telephone questionnaire. This form is intended to be used to supply missing information when necessary. Responses to this collection are voluntary. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.
