

through this notice provide information on the revisions that were made to the azinphos-methyl preliminary risk assessments, which were released to the public August 10, 1998 (63 FR 43175) (FRL-6024-3), and January 15, 1999 (64 FR 2644) (FRL-6056-9), through notices in the **Federal Register**.

In addition, this notice starts a 60-day public participation period during which the public is encouraged to submit risk management proposals or otherwise comment on risk management for azinphos-methyl. The Agency is providing an opportunity, through this notice, for interested parties to provide written risk management proposals or ideas to the Agency on the chemical specified in this notice. Such comments and proposals could address ideas about how to manage dietary, occupational, or ecological risks on specific azinphos-methyl use sites or crops across the United States or in a particular geographic region of the country. To address dietary risk, for example, commentors may choose to discuss the feasibility of lower application rates, increasing the time interval between application and harvest ("pre-harvest intervals"), modifications in use, or suggest alternative measures to reduce residues contributing to dietary exposure. For occupational risks, commentors may suggest personal protective equipment or technologies to reduce exposure to workers and pesticide handlers. Although revisions to the ecological risk assessment are not yet complete, EPA welcomes suggestions for reducing environmental exposure. EPA will provide other opportunities for public participation and comment on issues associated with the organophosphate tolerance reassessment program. Failure to

participate or comment as part of this opportunity will in no way prejudice or limit a commentor's opportunity to participate fully in later notice and comment processes. All comments and proposals must be received by EPA on or before July 19, 1999 at the addresses given under the "ADDRESSES" section. Comments and proposals will become part of the Agency record for the organophosphate specified in this notice.

Dated: May 13, 1999.
