

Applicant specified in the particular applications.

Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

**Linwood A. Watson, Jr.,**

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. RP99-166-000]

#### Stingray Pipeline Company; Notice of Informal Settlement Conference

May 13, 1999.

Take notice that an informal settlement conference in this proceeding will be convened on Wednesday, May 19, 1999, at 10:00 a.m., at the offices of the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, for the purpose of exploring the possible settlement of the above-referenced docket.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, please contact Arnold H. Meltz at (202) 208-2161 or Dawn Martin at (202) 208-0661.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-6345-1]

### Agency Information Collection Activities: Submission for OMB Review; Comment Request, NSPS, Calciners and Dryers in Mineral Industries

AGENCY: Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS subpart UUU, OMB Control Number 2060-0251, expiration date 06/30/99. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before June 18, 1999.

**FOR FURTHER INFORMATION CONTACT:**

Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 0746.04.

**SUPPLEMENTARY INFORMATION:**

*Title:* NSPS Subpart UUU (OMB Control No. 2060-0251; EPA ICR No. 0746.04) expiring 06/30/99. This is a request for extension of a currently approved collection.

*Abstract:* The New Source Performance Standard (NSPS) for Calciners and Dryers in Mineral Industries were proposed on April 23, 1986 and promulgated on September 28, 1992. These standards apply to new, modified and reconstructed calciners and dryers at mineral processing plants that process or produce any of the following minerals and their concentrates or any mixture of which the majority is any of the following minerals or a combination of these minerals: Alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite. Particulate matter is the pollutant regulated under this subpart.

There are several exceptions to applicability. Feed and product conveyors are not considered part of the affected facility. Facilities subject to NSPS subpart LL, Metallic Mineral Processing Plants are not subject to this standard. There are additional processes and process units at mineral processing plants listed at 60.730(b) which are not subject to the provisions of this subpart.

Owners or operators of the affected facilities must make one-time only reports including notifications of start up, scheduling and results of the initial performance test, notification of any physical or operational change to an

existing facility which may increase the regulated pollutant emission rate; notification of the demonstration of the continuous monitoring system (CMS). Owners or operators are also required to maintain records of the occurrence and duration of any startup, shut down, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Performance tests are needed as these are the Agency's records of a source's initial capability to comply with emissions standards and note the operating conditions under which compliance was achieved. These notifications, reports and records are required, in general, of all sources subject to NSPS.

The monitoring requirements are outlined in section 60.734. They are dependant on the type of dryers or calciner. Specific calciners and dryers are required to install, calibrate, maintain, and operate a continuous monitoring system. Semiannual reports of excess emissions are required.

This information is being collected to assure compliance with 40 CFR part 60, subpart UUU. Any owner or operator subject to the provisions of this part will maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, (as specified in 60.735, Recordkeeping and Reporting). All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

Approximately 150 sources are currently subject to the standard, and approximately 5 sources a year become subject.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published in FR Vol. 63 No. 172 on September 4, 1998. No comments were received.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 19 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions;
