For questions only, you may use the electronic address [banks.julius@epa.gov](mailto:banks.julius@epa.gov). All comments must be sent to the docket.

### SUPPLEMENTARY INFORMATION:

*Affected entities:* Entities potentially affected by this action are refrigeration and air-conditioning service and repair shops; plumbing, heating, and air-conditioning contractors; refrigerated transport service dealers; scrap metal recyclers; automobile dismantlers and recyclers. Additional entities affected include Clean Air Act section 608

technician certification programs, equipment certification programs, refrigerant wholesalers and reclaimers, and other establishments that perform refrigerant removal, service, and/or disposal.

*Title:* "National Recycling and Emissions Reduction Program" (OMB Control No. 2060-0256; EPA ICR No. 1626.07) expiring 6/30/99.

*Abstract:* In 1993, EPA promulgated regulations under section 608 of the Clean Air Act Amendments of 1990 for the recycling of ozone depleting refrigerants, specifically chlorofluorocarbons (CFCs) and hydrofluorocarbons (HCFCs), in air-conditioning and refrigeration equipment. These regulations were published on May 14, 1993 (58 FR 28660) and codified in 40 CFR subpart F (section 82.150 *et seq.*). Section 608 also establishes self-effectuating prohibitions on the knowing venting, release, or disposal of any substitute substance for ozone-depleting refrigerants during the maintenance, service, repair, and disposal of any device which contains and uses any substitute refrigerant for household or commercial purposes. Substitutes may be exempt from this prohibition if EPA determines that venting, releasing, or disposing of such substances does not pose a threat to the environment. Substitutes for CFCs and HCFCs are included in recordkeeping requirements which will not lead to additional burden hours on affected entities. The reasons for collection of the information; its intended use; and whether the requirements are mandatory, voluntary, or required to obtain a benefit are described below. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Burden Statement:* Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The annual burden is reported in this Notice by annual respondent burden. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Additional burden hours associated with the implementation of this notice are avoided due to the marketplace balance that will occur as ozone-depleting substances are phased out and replaced by substitutes; therefore, this ICR renewal does not include any burden for third-party or public disclosures that were not previously reviewed and approved by OMB. The annual burden hours for this collection of information are estimated as follows: 16 hours for two equipment testing organizations; 1,125 hours for an estimated 2,250 service establishments that will change ownership or enter the market; 12.5 hours for an estimated 25 disposal establishments that change ownership or enter the market; 10,000 hours for the maintenance of copies of signed statements by an estimated 500 disposal establishments; 40 hours for certification of an estimated 20 refrigerant reclaimers that change ownership or enter the market; 400

hours for reclaimer reporting from an estimated 80 respondents; 40,000 hours for an estimated 5,000 refrigerant wholesalers to maintain records of refrigerant sales transactions; 300 hours for an estimated 10 technician certification programs applying for first-time approval; 1,600 hours for 100 technician certification programs to maintain records; 96,000 hours for an estimated 330,000 technicians acquiring certification and maintaining certification cards; 268,500 hours for an estimated 2,003,850 owners of refrigeration and air-conditioning equipment to maintain records on refrigerant and equipment; and 990 hours for an estimated 210 owners of industrial process refrigeration equipment.

Dated: May 7, 1999.
