

information is set out in Commission Paper—SECY–28–273, “Potential Funding Assistance for Agreement States for Closure of Formerly Terminated NRC Licenses” dated November 20, 1998. In this paper, the NRC staff reports on Agreement State and NRC staff actions and presents options and recommendations for funding Agreement States’ efforts in addressing this issue.

The Commission responded to this paper through issuance of a Staff Requirement Memorandum (SRM) for SECY–98–273. In this memorandum, the Commission approved the NRC staff recommendation to continue Agreement State jurisdiction over formerly licensed sites and to develop a grant program to make funds available to Agreement States for file review and remediation in certain cases. The recommended option is to pursue a separate appropriation from the General Fund. This separate appropriation, if approved, would fund Agreement States, through grants, to assist in completing file reviews and the remediation of formerly NRC-licensed sites in certain cases. Such cases include sites when no responsible party can be located, or the responsible party does not have the resources to conduct the remediation, and the site does not qualify for cleanup under the Comprehensive Environmental Response, Compensation, and Liability Act.

In the SRM for SECY–98–273, the Commission directed the staff to seek stakeholder views before pursuing a General Fund appropriation. Public comments are requested on:

- The option of pursuing a separate appropriation from the General Fund to establish a fund for use by Agreement States through grants to assist in file reviews and, when necessary, the remediation of formerly NRC-license sites.

- Aspects that should be considered in development of a decision framework that describes how NRC would allocate the appropriated funds, if approved, to individual Agreement States.

- Aspects that NRC should consider in development of a grant program for providing funds, if approved, to individual Agreement States to ensure a relatively fair and equitable allocation of available funds. For example, the funds could be provided to individual Agreement States based on the estimated cost for each site to comply with a 25 millirem/year public dose standard. Additional risk-ranking of the sites may also be necessary in the event that appropriated funds are less than requested.

- Additional information on cost estimates for site remediation (See cost estimates stated in SECY–28–273. Also see all Agreement States letter SP–99–016.)

The above three documents, SECY–28–273, SRM–SECY–28–273 and SP–99–016, are available on the NRC homepage at: <http://www.hsrn.gov/nrc/agstates/program/sp99016.pdf>
