In support of its request, MIT asserts that the company is still in the process of replacing its existing computer system and, although progress has been made on its Website, MIT has not yet been able to achieve full compliance with the Commission's existing requirements. MIT states that additional

time is needed to complete the process. Further, MIT requests a continuation of its current one year waiver from EDI requirements asserting that MIT's size and customer base lend themselves more adequately to Internet Website development and do not justify the investment currently required for EDI.
