It also prescribes requirements governing holders of the specific licenses. Some of the requirements are information which must be submitted in an application for

a specific license, records which must be kept, reports which must be submitted, and information which must be forwarded to general licensees and persons exempt from licensing. In addition, 10 CFR Part 32 prescribes requirements for the issuance of certificates of registration (concerning radiation safety information about a product) to manufacturers or initial transferors of sealed sources and devices. Submission or retention of the information is mandatory for persons subject to the 10 CFR Part 32 requirements. The information is used by NRC to make licensing and other regulatory determinations concerning the use of radioactive byproduct material in products and devices.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-423]

Northeast Nuclear Energy Company, et al. Millstone Nuclear Power Station, Unit No. 3; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has

granted the request of Northeast Nuclear Energy Company (the licensee) to withdraw its July 26, 1995, application, as supplemented by letter dated July 17, 1996, for proposed amendment to Facility Operating License No. NPF-49 for the Millstone Nuclear Power Station, Unit No. 3, located in New London County, Connecticut.

The proposed amendment would have revised the facility technical specifications pertaining to the protective functions instrumentation surveillance interval, extending the interval from the current 18-month to a 24-month fuel cycle, and would have revised the Reactor Trip System (RTS) and Engineered Safety Features Actuation System (ESFAS) instrumentation trip setpoints tables from the existing five columns to a single column format that lists only nominal trip setpoints. Revision to the RTS and ESFAS instrumentation trip setpoints tables were subsequently resubmitted under a separate amendment request dated October 15, 1997, as supplemented January 23 and April 8, 1998, and approved in amendment number 159, issued on May 26, 1998.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 27, 1995 (60 FR 58402). However, by letter dated April 22, 1999, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated July 26, 1995, as supplemented by letter dated July 17, 1996, and the licensee's letter dated April 22, 1999, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the Millstone Unit 3 local public document rooms located at the Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, Connecticut, and the Waterford Public Library, ATTN: Vince Juliano, 49 Rope Ferry Road, Waterford, Connecticut.
