

whale watch companies who have volunteered to participate in this monitoring program. The USCG Auxiliary will also use other platforms, such as USCG Auxiliary vessels and aircraft to observe the activities of recreational and commercial whale watch vessel operators on Stellwagen Bank and in other waters off New England during the 1999 season.

The results of the USCG Auxiliary monitoring program are expected to help NOAA determine whether the voluntary guidelines are sufficient or whether additional measures, such as regulations, need to be implemented to prevent harassment or injury of whales in coastal waters of the Northeastern United States.
