SUPPLEMENTARY INFORMATION: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The PBGC intends to request that OMB extend its approval of a collection of information needed to pay participants and beneficiaries who may be entitled to pension benefits under a defined benefit plan that has terminated (OMB Control No. 1212-0055; expires June 30, 2000). The collection consists of information participants and beneficiaries are asked to provide in connection with an application for benefits. In addition, in some instances, as part of a search for participants and beneficiaries who may be entitled to benefits, the PBGC requests individuals to provide identifying information as part of an initial contact with the PBGC. All requested information is needed to enable the PBGC to determine benefit entitlements and to make appropriate payments.

The PBGC intends to request that OMB approve revisions to the forms and instructions. The revisions simplify language and incorporate regulatory changes. The PBGC does not anticipate a change in burden hours currently approved as a result of these revisions.

The PBGC estimates that it will request that 71,250 individuals submit identifying applications for benefits and that the associated burden is 30,875 hours (an average of slightly less than 30 minutes per individual). The PBGC further estimates that 5,000 individuals will provide the PBGC with identifying information as part of an initial contact and that the associated burden is 1,250 hours (15 minutes per individual). The average annual postage cost is approximately \$24,400. Thus, the total estimated burden associated with this collection of information is approximately 32,125 hours and \$24,400.

The PBGC solicits comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Issued at Washington, DC, this 26th day of May, 1999.

Stuart A. Sirkin,

Director, Corporate Policy and Research Department, Pension Benefit Guaranty Corporation.
