#### Notice of Proposed Withdrawal; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

**SUMMARY:** The Secretary of the Interior proposes to withdraw approximately 165,000 acres of Federal lands and 6,400 acres of reserved Federal minerals to protect nationally significant scientific and cultural resource values, and the ecological diversity of the Yellow Jacket Canyon region of southwestern Colorado. This notice segregates the lands and minerals described below for up to 2 years from surface entry, mineral material sales, and mining. The lands will remain open to mineral leasing.

**FOR FURTHER INFORMATION CONTACT:** Mark Stiles, Southwest Center Manager, Bureau of Land Management, 2465 South Townsend, Montrose, Colorado 81401, 970-240-5300.

**SUPPLEMENTARY INFORMATION:** The purpose of the proposed withdrawal is to protect the nationally significant scientific and cultural resource values and the ecological diversity of the Yellow Jacket Canyon area while the lands are under study for additional protection through some form of special designation. The area represents the focus of northern Anasazi development, with more than 100 sites per square mile in many areas, representing the highest known archaeological site density of any area in the nation. The total number of sites on public lands within the area is estimated at nearly 20,000. In 1985, the Bureau of Land Management's Resource Management Plan for the San Juan/San Miguel Planning Area designated the area as the Anasazi Culture Multiple Use Area of Critical Environmental Concern (ACEC) in recognition of the tremendous cultural values present.

Approximately 90 percent of the land proposed for withdrawal is currently leased for oil and gas under the Mineral Leasing Act of 1920. Approximately 74 producing oil, gas, and carbon dioxide wells maintain these leases. The temporary segregation and subsequent withdrawal would not affect existing mineral leases or any of the associated facilities or authorizations currently in place, nor would it affect the ability of the Bureau of Land Management to authorize actions typically associated with oil and gas development (such as
