to increase transfer of information on state-of-the-art technology and to increase the exchange of research information and expertise between the academia, state agencies, and engineering, mining, and construction entities. The projects approved for funding will help the State in reclaiming AML sites and assist Wyoming, other States and the Office of Surface Mining in reclamation methods for both active and abandoned mine sites. The DEQ reviews the recommendations of the Selection Committee to assure that selected projects are eligible for funding under section 403 and 404 of Pub. L. 95–87.

IV. How We Will Review Wyoming's Grant Application

We will review this grant application with respect to the regulations at 30 CFR 875.15, specifically §§ 875.15(e) (1) through (7). As stated in those regulations, the application must include the following information: (1) The need or urgency for the activity or the construction of the public facility; (2) the expected impact the project will have on Wyoming's coal or minerals industry; (3) the availability of funding from other sources and, if other funding is provided, its percentage of the total costs involved; (4) documentation from other local, State, and Federal agencies with oversight for such utilities or facilities describing what funding they have available and why their agency is not fully funding this specific project; (5) the impact on the State, the public, and the minerals industry if the facility is not funded; (6) the reason why this project should be selected before a priority project relating to the protection of the public health and safety or the environment from the damages caused by past mining activities, and (7) an analysis and review of the procedures Wyoming used to notify and involve the public in this funding request, and a copy of all comments received and their resolution by the State. Wyoming's application for the Abandoned Coal Mine Land Research Program projects contains the information described in these seven subsections.

Section 875.15(f) requires us to evaluate all comments we receive and determine whether the funding meets the requirements of §§ 875.15(e) (1) through (7) described above. It also requires us to determine if the request is in the best interests of the State's AML program. We will approve Wyoming's request to fund this project if we conclude that it meets all the requirements of 30 CFR 875.15.

V. What To Do if You Want To Comment on the Proposed Project

We are asking for public comments on Wyoming's request for funds to pay for the Abandoned Coal Mine Land Research Program. You are welcome to comment on the project. If you do, please send us written comments. Make sure your comments are specific and pertain to Wyoming's funding request in the context of the regulations at 30 CFR 875.15 and the provisions of section 411 of SMCRA. You should explain any recommendations you make. If we receive your comments after the time shown under DATES or at locations other than the Casper Field Office, we will not necessarily consider them in our final decision or include them in the administrative record.

Dated: June 11, 1999.

Guy Padgett, Director, Casper Field Office.

SUPPLEMENTARY INFORMATION:

I. Background on Title IV of SMCRA

Title IV of the Surface Mining Control and Reclamation Act (SMCRA) established an Abandoned Mine Land Reclamation (AMLR) program. The purpose of the AMLR program is to reclaim and restore lands and waters that were adversely affected by past mining. The program is funded by a reclamation fee paid by active coal mining operations. Lands and waters eligible for reclamation under Title IV are primarily those that were mined, or affected by mining, and abandoned or inadequately reclaimed before August 3, 1977, and for which there is no continuing reclamation responsibility under State, Federal, or other laws.

Title IV of SMCRA allows States to submit AMLR plans to us. We, on behalf of the Secretary, review those plans and consider any public comments we receive about them. If we determine that a State has the ability and necessary legislation to operate an AMLR program, the Secretary can approve it. The Secretary's approval gives a State exclusive authority to put its AMLR plan into effect.

Once the Secretary approves a State's AMLR plan, the State may annually apply to us for money to fund specific projects that will achieve the goals of its approved plan. We follow the requirements of the Federal regulations at 30 CFR parts 874, 875, and 886 when we review and approve such applications.

II. Background on the Wyoming AMLR Plan

The Secretary of the Interior approved Wyoming's AMLR plan on February 14, 1983. You can find background information on the Wyoming AMLR program, including the Secretary's findings and our responses to
Wyoming changed its plan a number of times since the Secretary first approved it. In 1984, we accepted the State’s certification that it addressed all known coal-related impacts in Wyoming that were eligible for funding under its program. As a result, the State may now reclaim low priority non-coal reclamation projects. As a result, the State may now reclaim any additional coal-related problems that occur during the life of the Wyoming AML program as soon as it becomes aware of them. In the April 13, 1992, Federal Register, we announced our decision to accept other changes in Wyoming’s plan that describe how it will rank eligible coal, non-coal, and facility projects for funding. Those changes also authorized the Governor of Wyoming to elevate the priority of a project based upon the Governor’s determination of need and urgency. They also expanded the State’s ability to construct public facilities under section 411 of SMCRA. We approved additional changes in Wyoming’s plan concerning noncoal lien authority and contractor eligibility that improve the efficiency of the State’s AML program. That approval is described in the February 21, 1996, Federal Register.

Once a State certifies that it has addressed all remaining abandoned coal mine problems, and the Secretary concurs, then it may request funds to undertake abandoned noncoal mine reclamation, community impact assistance, and public facilities projects under sections 411(b), (e), and (f), of SMCRA. State law and regulations that apply to the proposed Greybull funding request include Wyoming Statute 35-11-1202 and Wyoming Abandoned Mine Land Regulations, Chapter VII, of the Wyoming Abandoned Mine Program.

III. Wyoming’s Request To Fund Part of the Cost of the Greybull Sewer Replacement Project
The Wyoming Department of Environmental Quality submitted to us a grant application dated December 21, 1998. In that application, Wyoming asked for $302,885 that it will use to pay for part of the cost of building the Greybull Sewer in Big Horn County, Wyoming. This new project is a public facility in a community impacted by coal mining activities. The requested funding is 84.6 percent of the project’s total cost. Money for the balance of the project cost will come from the City of Greybull (15.4 percent).

The Governor of Wyoming certified the need and urgency to fund the Greybull Sewer Replacement project prior to completing the State’s remaining inventory of non-coal reclamation work, as allowed by section 411(f) of SMCRA. The governor certifies that the project is in a community impacted by coal mining activities. The present sewer system is deteriorating rapidly and it is suspected that it is contaminating ground water and surface water.

The Governor’s certification states that the threat to public health and safety is greater at this site than on remaining non-coal mine sites.

IV. How We Will Review Wyoming’s Grant Application
We will review this grant application with respect to the regulations at 30 CFR 875.15, specifically subsections 875.15(e)(1) through (7). As stated in those regulations, the application must include the following information: (1) The need or urgency for the activity or the construction of the public facility; (2) the expected impact the project will have on Wyoming’s coal or minerals industry; (3) the availability of funding from other sources and, if other funding is provided, its percentage of the total costs involved; (4) documentation from other local, State, and Federal agencies with oversight for such utilities of facilities describing what funding they have available and why their agency is not fully funding this specific project; (5) the impact on the State, the public, and the minerals industry if the facility is not funded; (6) the reason why this project should be selected before a priority project relating to the protection of the public health and safety or the environment from the damages caused by past mining activities; and (7) an analysis and review of the procedures Wyoming used to notify and involve the public in this funding request, and a copy of all comments received and their resolution by the State. Wyoming’s application for the Greybull Sewer project contains the information described in these seven subsections.

Section 875.15(f) requires us to evaluate all comments we received and determine whether the funding meets the requirements of § 875.15(e)(1) through (7) described below. It also requires us to determine if the request is in the best interests of the State’s AML program. We will approve Wyoming’s request to fund this project if we conclude that it meets all the requirements of 30 CFR 875.15.

V. What To Do if You Want To Comment on the Proposed Project
We are asking for public comments on Wyoming’s request for funds to pay for part of the cost of the Greybull sewer system. You are welcome to comment on the project. If you do, please send us written comments. Make sure your comments are specific and pertain to Wyoming’s funding request in the context of the regulations at 30 CFR 875.15 and the provisions of section 411 of SMCRA. You should explain any recommendations you make. If we receive your comments after the time shown under DATES or at locations other than the Casper Field Office, we will not necessarily consider them in our final decision or include them in the administrative record.

Dated: June 11, 1999.
Guy Padgett,
Director, Casper Field Office.
