SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, criteria for recognizing the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to the approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft revised recovery plan is *iatris helleri* (Heller's blazing star). The areas of emphasis for recovery actions are the North Carolina counties of Avery, Caldwell, Burke, and Ashe. Habitat protection, population augmentation and reintroduction, and the preservation of genetic material are the major objectives of this recovery plan.

Public Comments Solicited

We solicit written comments on the recovery plan described. All comments

received by the date specified above will be considered prior to approval of the final plan.

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).
