SUPPLEMENTARY INFORMATION:

Background

Under part 1 of Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA), Title IV or ERISA, and the Internal Revenue Code of 1986, as amended (the Code), administrators of pension and welfare benefit plans (collectively, employee benefit plans) subject to those provisions, and employers sponsoring certain fringe benefit plans and other plans of deferred compensation, are required to file returns/reports annually concerning the financial condition and operation of the plans. These reporting requirements are satisfied generally by filing the Form 5500 Series in accordance with its instructions and related regulations. The Form 5500 is the primary source of information concerning the operation, funding, assets and investments of pension and other employee benefit plans.

On September 3, 1997, the Agencies published a Notice of Proposed Revision of Annual Information Return/Reports in the **Federal Register** (62 FR 46556). The Agencies' proposal replaced the Form 5500, Form 5500-C and Form 5500-R with one Form 5500 intended to streamline the report and the methods by which it is filed. A public hearing on the proposed forms revisions was held on November 17, 1997, and written comments on the proposal were received until the public record was closed on December 3, 1997.

Concurrent with the development of the new forms, the Agencies are also developing a new computerized system to process the Form 5500 ("EFAST"). The new computerized processing system is designed to simplify and expedite the receipt and processing of the new Form 5500 by relying on computer scannable forms and electronic filing technologies.

Contracts were awarded to two national computer firms to competitively develop this system and computer scannable versions of the new Form 5500. When the firms have completed their "small scale" system assignments, one of the two firms will be chosen to "scale-up" its system and process the new Form 5500 for five years. The firm chosen will receive the forms, process the data into machine-readable format, conduct specified edit tests for validity and completeness, correspond with filers whose filings fail one or more edit tests, attempt to perfect the data using filer responses and, finally, provide the data to the Agencies.

On June 24, 1998, a Notice was published in the **Federal Register** (63 FR 34493) that stated that the Agencies had submitted a public information
