k. *Description of Application:* On June 17, 1999, the Commission approved an emergency 45-day variance (which will expire on August 1, 1999) to reduce the minimum flow requirements of article 29 from 650 cubic feet per second (cfs) to 400 cfs during the drought conditions occurring at the Smith Mountain Project. The licensee continues to consult with the various resource agencies and stakeholders upstream and downstream of the project. The current situation is similar to that which existed last year for the project whereby the Commission granted a 45-day emergency variance to article 29 and a

subsequent 45-day extension after a public notice. In anticipation of no immediate relief to the low inflow situation at the Smith Mountain Project again this year and the distinct possibility that relief will not be forthcoming by August 1, 1999, the licensee is requesting to continue the temporary variance to license article 29 through September 30, 1999.

1. *Locations of the application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE, Room 2A, Washington, DC 20426, or by calling (202) 208-1371.
